

R

We provide the Stallion information 2024 as a tool to help with stallion choices. Opting for the best-quality stallions when choosing a stallion is not the only key factor to be considered, making correct pairings is even more important. The KFPS strives to provide as much data as possible regarding hereditary aspects of stallions.

Which stallions?

The 2024 edition lists all living and active stallions with a breeding permit. Deceased stallions are not listed bur for some of them frozen semen is still available. Please check the website for information or get in touch with the stallion station.

Exterior breeding values

When looking at breeding values for exterior it must be taken into account that the data of young stallions does as yet not include information about their offspring. These breeding values are based on lineage information and exterior assessment (linear score) of the stallion himself. For stallions that have completed progeny testing the breeding values are almost completely based on inspection data (linear scores) and ABFP data of offspring. The reliability of breeding values for young stallions is still low. This means that their breeding values are more likely to change (when more offspring are inspected or tested) than in the case of older stallions with a high reliability index. Because of the lower reliability of breeding values for young stallions, these are compiled based on a more reserved estimate and are therefore closer to the breed average (100).

Which characteristics?

The following characteristics of stallions are listed:

- 1. Breeding values (linear) exterior characteristics
- 2. Breeding values for movement/sport aptitude (based on aptitude tests)
- 3. Breeding values for character
- 4. Breeding values for sport (based on competition sports)

Explanation breeding values

Considering the complexity of breeding value estimates for exterior characteristics and sport aptitude, it is necessary to provide an explanation about how these figures are compiled and how they should be interpreted. This explanation pays attention to how these figures can be used for stallion choices.

The linear exterior characteristics

The breeding values for the exterior characteristics are based on the linear scores which, since 1993, are being recorded at the moment of acceptance of horses in the Studbook. Scores ranging between 5 and 45 are recorded for 25 exterior characteristics, with the average being 25. In the case of linear characteristics we are strictly dealing with observations and not evaluations. The choice of characteristics is such that the linear report provides a picture of the horse's exterior that is as complete as possible. The linear characteristics are divided into two entities: Optimum characteristics: characteristics with the average score (25) or breeding value (100) being the most favourable. Examples of such characteristics are: back conformation and hind leg conformation. Maximum characteristics: characteristics based on the principle of: the higher the better (e.g. expression of the head, movement expression etc.), or characteristics where the optimum clearly lies above the average like neck conformation and shape of the feet. The differences are visually recognisable because the breeding values for maximum characteristics are represented in dark-blue bars (favourable) and red bars (unfavourable) and breeding values for optimum characteristics in light-blue bars. In addition to the 25 linear characteristics the overview lists one measured characteristic, which is height at withers.

The rating exterior characteristics

In addition to the 25 linear exterior characteristics, scoring is also done for 3 rating characteristics: breeding type, conformation and legwork. Whereas linear characteristics are mere descriptions, the rating characteristics are evaluative. For the assessment of the rating exterior characteristics the related linear characteristics play an important role. The rating characteristics are scored within the range of 4 to 9. Since 2016 the marks for rating characteristics that are scored in the context of upgrading are also included in the breeding value estimate. Additionally, since 2017 the lower bar figures scored in the classes for Star mares are also included in the breeding value estimate.

Reliability

The degree in which the breeding value gives an accurate picture of a stallion's true genetic aptitude is expressed in the reliability estimate (btbh.). Reliability is chiefly influenced by the number of inspected offspring. Breeding values with a low reliability can still change considerably when more offspring are inspected. Reliability can be interpreted as follows:

btbh.	interpretation
< 70%	moderate reliability
70-80%	reasonable reliability
80-90%	good reliability
>90%	very good reliability
To be elig	ible for publication, the reliability of every
breeding	value has to be 30% or more.

Movement and sport aptitude

The breeding values for the movement characteristics walk, trot and canter are computed on the basis of the scores for walk and trot in the exterior inspection and the scores for walk, trot and canter from the aptitude tests (ABFP and IBOP). The higher the number of offspring whose information is collected from the aptitude tests, the smaller the influence of in-hand movement will be for breeding values. In case of large numbers of offspring and the information derived from their aptitude tests, the influence of in-hand movement even becomes virtually zero. The reason for this being that movement in the aptitude tests (under saddle and in harness) is closer to the breeding goal than in-hand movement.

Character

Breeding values for character are being included since the 2020 edition. This information stems from the twenty offspring in the ABFP Tests that are scored on character by the rider team. The published character/personality characteristics are: reliability/ predictability; trainability; willingness to work and stamina.

Sport (competition sports)

Starting with the 2023 edition, the breeding values for sport based on sport data are also listed. The information is provided by the KNHS and the highest known results for dressage and driving dressage are used. The reliability is still low and the degree of heredity small. For the future the intention is to also add the international sport data from the Sport Federation FEI and the results in showdriving sports.

The estimation model

The breeding values, estimated by CRV, are estimated with a so-called estimation model. The estimation model indicates which of the factors influencing the differences between (in this case) stallions are subjected to corrections. The exterior scores are corrected for the following effects: breeding value of the offspring's dam, age at the moment of inspection, gender; Jury member and inspection. This correction is carried out in order to produce the clearest possible picture of the degree in which the differences between batches of offspring are caused by a difference in genetic aptitude of the stallions. Because of these corrective factors it basically does not matter if one stallion is paired to higher-quality mares than others. The type of estimation model used is the so-called animal model. Along with data of offspring, animal models also include information of relatives. The contribution of this information decreases as the available information of offspring rises.

Interpretation of breeding values

Breeding values are set at an average of 100 with a range of 4 points on either side. This basis was fixed at 2001. The average breeding values of all horses born in 2001 were fixed at 100 for every characteristic and the range (standard deviation) of these breeding values was fixed at 4. Breeding values with a deviation in relation to 100 of one time the range (between 96 and 104) have to be considered as being average. Over 2/3 of breeding values are found in this area. It is self-evident that the larger the deviation from 100, the bigger the expected effect will be. A stallion with a breeding value of 109 or higher for say, movement expression, ranks with the best 2% of stallions in the population. With a breeding value higher than 112 this is 0.1%. The breeding values for total-exterior and total-movement are the average of the underlying characteristics (breeding type, conformation and legwork respectively walk, trot and canter), multiplied by 1.25 in order to achieve a range of 4 for the total-breeding values.

Description of breeding values

The breeding values are depicted by 'bars' per individual characteristic. As pointed out, the maximum characteristics are printed in dark-blue (favourable) and red (unfavourable) and optimum characteristics in light-blue bars. For optimum characteristics, (extreme) deflections to the left or right represent an unfavourable picture, here 100 is the optimum.

Summarising: bars to the left are usually unfavourable and bars to the right are favourable, except for the light-blue bars.

Use of breeding values

The breeding values for exterior are an excellent tool for making the right pairing combination. The way to do this is by checking the mare's linear score form for aspects that should be corrected. If the characteristic that needs to be improved is a maximum characteristic then a stallion must be selected who has a (distinctly) positive hereditary profile for passing on this characteristic (bar to the right). If it is an optimum characteristic then the best choice would be a stallion with a (light) deviation in the opposite direction, depending on the mare's score.

Use of breeding values for sport aptitude

As you can see there are estimates for breeding values of basic gaits in the exterior bar and in the sport aptitude bar. The first is based on the assessment of basic gaits in the inspection ring

(in-hand), whereas the second is based on the assessment of basic gaits in use (ABFP Test). For most stallions these breeding values largely overlap. There are however, stallions whose breeding value for basic gaits in the sport index is a fair bit lower than the breeding value for basic gaits in the exterior bar. As the breeding goal stimulates the breeding of horses with good basic gaits in use, the breeding values for sport aptitude should carry more weight in your evaluation of stallions.

Preferent points

For every stallion this Stallion Information also lists the number of points for Preferent status. Preferent points are the sum of points which the stallion's offspring collect after having received a predicate. There are fixed weighing factors for every predicate.

A Star for instance represents 1 point and a Studbook stallion approved on offspring contributes 50 points. The total of points is listed per stallion, however, the rule of thumb of 1000 points leading to the Preferent predicate no longer applies. For every stallion with at least 700 offspring aged at minimum three years or older, a ratio figure will be computed and published annually. This ratio figure indicates

whether or not a stallion performs exceptionally well compared to other stallions in that year. The average ratio figure across a number of years decides if a stallion can become Preferent. For more explanation about Preferent points:

Kinship percentage

For Studbook stallions a kinship percentage is listed. This figure states the stallion's kinship to the population. The lower this figure, the bigger such a stallion's contribution to variation in bloodlines can be. The average kinship percentage of Studbook stallions lies around 17.8%. The kinship percentage is computed by calculating the inbreeding of fictitious foals from combinations of all individual stallions with the mare population. The mare population being defined as all filly foals born in the past three years, in total over 8000 animals. For the inbreeding calculation all known generations are included (so not just the first five generations). The kinship percentage is influenced by the degree in which the bloodlines match or deviate from the population. As a stallion is used more often the kinship percentage will increase. The kinship percentage is one of the characteristics that are taken into account for the selection of young stallions, with the aim to curb the increase of inbreeding. Corrections for missing pedigree information have been applied for the calculation of kinship percentages in this edition. This is the reason why the kinship percentage for stallions with a 'short dam line' has been revised upwards.

Stallion information on the website

All information in this Stallion Information 2024 is also available on the KFPS website. Please go to www.kfps.nl -> Breeding or use the following QR code:

Foal Reports 2023

What does one foal say about its sire's qualities? Not much really, but a whole batch does paint a picture of breeding. Every year the KFPS Jury body compiles foal reports for those stallions whose first crop of offspring have been inspected. Below you find the foal reports of stallions that were approved in 2021.

ix stallions presented their first crop of offspring in the past inspection season. Martzen 521, Alger 522, Faust 523, Herre 524, Hilbrand 525 and Gosse 526. About 40% (range 37-45%) of the foals that were born were presented for inspection. For the interpretation of numbers in the diagram please remember to factor in that some stallions get more opportunities than others when it comes to the quality of serviced mares. Alger 522 for instance, serviced an evidently lower percentage of minimal Star mares whereas Gosse 526 serviced an evidently higher percentage of minimal Star mares.

Martzen 521 (Dries 421 x Abe 346)

The batch of satisfactorily developed Martzen 521 foals is uniform. The foals are satisfactorily longlined and legs are of average length. The offspring have lots of breed expression thanks to their noble heads, satisfactory head-neck connection and long, vertical necks. Body shape is average. Shoulder conformation is predominantly sloping. They show satisfactory strength in the loin section but some lack a bit of strength in their back. The croup is often short and sloping. Stance of the foreleg is usually correct, toeing-in sometimes occurs. Stance of the hind leg is a fraction sickle-hocked. The legwork radiates quality. The walk is roomy and powerful. In trot the foals demonstrate scope and use of the hind leg with satisfactory power as well as suppleness and they move in an uphill frame. Placing the hind leg forward under the body is satisfactory.

Alger 522 (Haike 482 x Wylster 463)

The Alger 522 offspring show little uniformity but they are satisfactorily longlined, high-legged and well-developed foals. Expression of the heads is satisfactory and neck conformation is vertical with satisfactory length. There is much variation in terms of head-neck connection. The same is true for body shape. Many have steep shoulder conformation. Back and loin section should be stronger. Croup conformation is mostly sloping and with satisfactory length. Seen from the front stance of the foreleg is correct. Many are sickle-hocked in the hind leg. Cow-hocked stance also occurs. Overall, the legwork radiates quality. There is much variation in length of the walk. Expression of the walk is average. The trot is roomy with satisfactory power and good use of the foreleg as well as more than satisfactory suppleness. Body posture in trot is rather variable. The hind leg should be placed further forward under the body.

Faust 523 (Maurits 437 x Haitse 425)

The Faust 523 offspring are a group of foals with satisfactory development but little uniformity. They are mostly longlined foals with satisfactory longlined quality, but we also see somewhat

compact foals. Expression of the head is average, many have a heavy head-neck connection. The necks are usually long with vertical conformation. Body shape varies and is mostly a little downhill. There is much variation in shoulder conformation. Half of the foals should have more strength in the topline. The croups are sloping and usually have satisfactory length. Stance of the foreleg is largely correct, (notable) toeing-in of the foreleg occasionally occurs. Stance of the hind leg is very sickle-hocked. Most of them have satisfactory quality of legwork. Length as well as expression of the walk are variable. Some of the foals lack rhythm in the walk. In trot too there is a lot of variation in the trot characteristics and therefore no uniformity. The hind leg should step further forward under the body.

Herre 524 (Nane 492 x Reinder 452)

The satisfactorily uniform group of Herre 524 foals are well- to very well-developed foals, mostly longlined and satisfactorily high-legged. The foals have lots of breed expression: very expressive heads as well as long and vertical necks. Many of them however, have a heavy head-neck connection. There is much variation in terms of body shape. Shoulder conformation is usually sloping. Back and loin section are often weak. Croup conformation is mostly sloping and with satisfactory length. Stance of the foreleg is usually correct, (serious) toeing-in sometimes occurs. Stance of the hind leg is sickle-hocked. Most of them have satisfactory quality of legwork. Length in the walk is variable, but powerful. Some foals need to develop more rhythm in the walk. The trot is roomy with good bend in the hock and good use of the foreleg, good suppleness and an uphill body frame. Some should step further under the body with the hind leg.

Hilbrand 525 (Hette 481 x Alwin 469)

Hilbrand 525 presents a uniform group of well-developed, satisfactorily longlined and high-legged foals with an uphill build. The foals owe their breed expression to their remarkably aristocratic heads and vertical stance of the neck. Head-neck connections and length of the neck present a variable picture. Body shape is positive. Shoulder conformation is sloping. Overall, back and loin section should be a bit stronger. Croup conformation is mostly sloping, but varies in length. Stance of the foreleg is largely correct, however, toeing-out as well as toeing-in occurs. The hind leg is a fraction sickle-hocked. The legwork is dry. Most have a walk with satisfactory power and ground-coverage. Some have an irregular walk. The roomy trot combines good suppleness with a finely-engaged hind leg and an uphill body frame.

Gosse 526 (Nane 492 x Beart 411)

Gosse 526 presents a uniform collection of satisfactorily longlined and developed foals that across the board might have been

a bit more high-legged, but they demonstrate remarkably good movement. The heads should be slightly more aristocratic (we frequently see a long face and convex (Roman) nose) and many have a heavy head-neck connection. Still, they have more than satisfactory breed expression thanks to their mostly long necks with vertical build, which gives the foals a lot of front. Occasionally we see an upside-down neck. Many of the offspring have downhill body shape and lack length in the foreleg. There is much variation in shoulder conformation. Back and loin section are mostly weak. The croup is very sloping, length of the croup varies. Stance of the foreleg is usually correct, toeing-in sometimes occurs. The hind leg is clearly sickle-hocked and sometimes cow-hocked. The leqwork radiates dry quality. The Gosse foals have good walks: roomy, with satisfactory strength and ample shoulder freedom. The trot has good length and is powerful with satisfactory uphill body posture and satisfactory suppleness. The foreleg is placed well forward under the body. Placing the hind leg forward under the body is generally satisfactory.

For the interpretation of numbers it should be factored in that some stallions get more opportunities than others in terms of quality of serviced mares

Jeroen 535

Stallion Information

november 2023

Watch the video:

Studbook name: Jeroen Poll Breeder: M. van Aken-Poll, Grijpskerk. Date of birth: 4 August 2011 Height at withers: 1.69 metres Lineage: Anders 451 x Ster Folkert 353 x Ster Pref*6 Lammert 260 x Model Hotse 223 x Ster Jetse 225 x Model Nanne 197 Pedigree: 65 Kinship: 17.2 % (average 17,8%)

Exterior:

Breeding type: Jeroen 535 is a stallion with satisfactory breed expression. The stallion has satisfactory noble expression of the head with satisfactory feathers and a long forelock. The long neck has a vertical build.

Conformation: The 12-year-old Jeroen 535 is a stallion standing in a slightly square model. We would like to see a bit more strength in the topline, croup conformation is good both in shape and length.

Legwork: The stallion has good-quality legwork, dry and clean with good size of the feet. He is somewhat back in the knee in the foreleg and has a slightly coarse curb under the hock.

Estimated breeding value exterior:

At the moment of this report no breeding values were as yet available because for Jeroen 535 this was his first time to be assessed on exterior as part of his participation in the Short Test.

DNA tests:

Dwarfism: Hydrocephaly: Veterinary: **Roaring:**

non-carrier status non-carrier status Chestnut factor: non-carrier status no observations grade 3, just acceptable

Short Test:

Jeroen 535 was allowed to join the Short Test on the basis of his exceptional international performances in the sport. This took place in Exloo from October the 27th through to and including November the 11th 2023 and was successfully completed by the stallion.

Stable manners: Jeroen 535 is a friendly, though slightly tense stallion in his day-to-day contact in the yard. No (stable) vices were found.

Attitude during work: The stallion gives more than satisfactory response to the aids, showing more than satisfactory willingness to work but relies on support and help from his rider when at work.

Character:		а	b	с	d	e	
Stable manners	difficult				х		pleasant
	energetic			х			calm
	frightened				х		inquisitive
	submissive				х		dominant
	hesitant				х		cheeky
	anxious			х			relaxed*

* during tacking/hitching up, taking temperature etc.

Canter: the stallion's canter shows satisfactory rhythm but he needs to move with more self-carriage and use of the body. In extended canter he shows good lengthening of stride.

Dam line:

Jeroen 535 is the last son of Thonny W. Star (Folkert 353) who died at the age of fourteen at the birth of her foal. This Star mare has given nine offspring with three of them having received the Star predicate. Jeroen 535's granddam is the Preferent Wardi Star (Lammert 260) who has produced as many as fifteen offspring. This fertile and durable mare can boast six Star offspring and her daughter Puck Star Preferent (Oepke 266) was declared Crown Jewel because of her ten Star offspring.

Final conclusion:

Jeroen 535's legwork shows durability and he has an interesting bloodline. Because of his relatively low kinship of 17.2% and his sport performances he can contribute to the breeding of the Friesian horse. On the basis of the above data the stallion Jeroen Poll Star Sport Elite is registered in the Studbook for stallions under the name of Jeroen 535.

Advice for use:

Jeroen 535 can be used to add front and sport mentality. The stallion is best used on mares with a roomy, regular walk.

Sport aptitude:

Jeroen 535 is active at Grand Prix level in dressage earning scores of 70% in international FEI competitions, which is a good indication of the stallion's trainability and zest for work.

Latest performance: 06/08/2023 – Ermelo – CDI3* - GP Freestyle to Music – 69.935%

Assessment by guest rider:

Jeroen 535 is active and forward-going during the presentation with the guest rider and can be ridden correctly from back to front into the rider contact. The stallion has a lot of stamina. Jeroen 535 should move with a little more use of the body, suppleness and self-carriage.

Walk: the stallion moves with more than satisfactory activity but needs to develop more scope and use of the body.

Trot: the stallion moves with satisfactory rhythm and activity but would benefit from more Impulsionion and self-carriage.

Elger 536

Stallion Information

november 2023

Watch the video:

Studbook name: Dedmer fan de Greidpleats **Life number:** 201701235 **Breeder:** A. Bouma, Nes **Date of birth:** 17 April 2017 **Height at withers:** 1.68 metres **Lineage:** Nane 492 x Ster Pref*7 Prest*4 Olof 315 x Ster Dirk 298 x Ster Oepke 266 x Ster Lammert 260 x Ster Ewoud 250 **Pedigree:** 30 **Kinship:** 17,8% (average 17,8%)

Exterior:

Breeding type: Elger 536 has lots of breed expression, also thanks to his lavish feathers. The stallion's head should be a bit more aristocratic but he has a long neck with satisfactory vertical build.

Conformation: The stallion's build is horizontal and he has a strong topline with a good connection to the loin section. The stallion has a long croup with good conformation.

Legwork: Elger 536 slightly lacks length in the foreleg. Stance of the forelegs is correct, the hind legs are slightly sicklehocked. The legwork has satisfactory clean quality but should be a little finer and drier.

Estimated breeding value exterior:

Reliability	40-48%
Breeding type	103
Conformation	107
Legwork	108
Walk	105
Trot	106
Canter	102

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring. **Dwarfism:** non-carrier status

Hydrocephaly:carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 2, acceptable

Observations stable manager, riders and drivers:

Elger 536 is an attentive and friendly stallion with very easy contact manners and he is not easily daunted by his surroundings. He gives his rider/driver confidence, is very easy to train and gives sharp reactions to the aids. In the harness the stallion still struggles a little to sustain the energy in his body and keep the connection.

Central Examination:

Elger 536 completed the Central Examination as a 6-year-old.

Training report:

Walk: Under saddle Elger 536 shows a walk with good rhythm and lots of scope, with good use of the body. With the in-harness work the stallion sometimes struggles a little with the rhythm.

Trot: In trot the stallion moves with satisfactory length of stride presenting satisfactory posture and a fine silhouette. He must learn to move with a little more use of the body and the hind leg should step under with more alacrity.

Canter: The stallion has a lot of power and technique in canter, with good uphill strides and lots of Impulsionion and capacity for transitions.

Riding horse aptitude:

Elger 536 responds very well to training under saddle and shows good mentality and lots of willingness to work. He produces a fine silhouette but needs to develop more natural capacity for self-carriage in trot. The stallion has a good walk with good use of the body. In canter he also demonstrates lots of self-carriage, balance and technique.

In-harness aptitude:

In driven work Elger 536 presents a picture that differs from his under-saddle performance: the stallion needs to develop more scope in the walk and in trot he needs a lot of speed to achieve selfcarriage and consequently struggles to keep the connection. Elger 536 does however produce satisfactory posture and also has satisfactory reach in the foreleg. The stallion shows little aptitude for showdriving.

Walk	7.0
Use foreleg	8.0
Use hind leg	6.5
Suspension	6.5
Posture	7.0
Front	7.0
Suppleness	6.5
Impulsion	6.5
Total	76.5

Conclusions Central Examination:

Elger 536 is very talented for riding horse. What particularly catches the eye are his roomy walk, his good mentality and his powerful and uphill canter. He must learn to develop more self-carriage in trot and place his hind leg forward under the body with more alacrity. The stallion shows little aptitude for showdriving work in which he needs a lot of speed to achieve self-carriage.

Dam line:

Elger 536's dam is the 18-year-old Renske Richtsje V. Star Preferent Performance (Olof 315). This very successful broodmare has in total given eleven offspring, with seven of them having received the Star predicate and one daughter has even made it to Model. Elger 536 is a full brother of Lútsen fan de Greidpleats Star who took part in the 2022 Presentation Days. Presently, Renske Richtsje is only used as a broodmare and had a foal at her side in 2023. This Olof 315 daughter is a breed-typical mare with a noble head, abundant feathers and a horizontal neck. Her shoulder is a fraction steep, her topline shows satisfactory strength and her loins look a bit weak. Her croup has satisfactory length but is a little sloping. Stance of Renske Richtsje's forelegs is correct, the hind legs are a fraction straight and generally the legwork should be slightly cleaner and drier. Her walk is correct with satisfactory activity.

Final conclusion:

Elger 536 is a longlined and imposing stallion. He radiates breed expression, has a strong topline and body shape is horizontal. The stallion has pleasing contact manners and shows lots of go. The canter is his strongest asset of the three basic gaits, with uphill strides, lots of power and good use of the body. In trot he should engage his hind leg with more alacrity. He is very talented for riding horse but clearly less so for driving- and showdriving work.

Advice for use:

Elger 536 can be used for mares with good use of the hind leg and is expected to improve the canter and willingness to work. The stallion is also expected to improve breed expression and make a positive contribution towards a cooperative character and a good mentality.

november 2023

Watch the video:

Studbook name: Jasper Life number: 201901189 Breeder: J. Loopers, Alteveer Date of birth: 19 April 2019 Height at withers: 1.70 metres Lineage: Alwin 469 x Ster AA Pier 448 x Ster Prest*4 Mintse 384 x Ster Foppe 290 x Ster Pref*4 Reitse 272 x Ster Pref*6 Hendrik 222 Pedigree: 99 Kinship: 18,2 % (average 17,8%)

Exterior:

Breeding type: Jeppe 537 is a breed-typical stallion with a head of satisfactory noble expression, abundant feathers and a long, vertical neck with a slight under-neck.

Conformation: Jeppe 537 is a longlined stallion with uphill build, a good topline and a strong loin section. The shoulder is a little steep and the croup is slightly sloping but with satisfactory length.

Legwork: Jeppe 537 is a high-legged horse with lots of length in the foreleg. Both forelegs are toeing-out, the hind legs are sickle-hocked and the gaskin is a bit long. He slightly lacks dry and clean quality of legwork.

Estimated breeding value exterior:

Reliability	39-43%
Breeding type	107
Conformation	110
Legwork	105
Walk	106
Trot	108
Canter	106

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, good

Observations stable manager, riders and drivers:

Jeppe 537 is an alert, investigative stallion who can be a little cheeky from time to time. He has honest and easy stable manners, is very cooperative but has a keen eye for his surroundings. Jeppe 537 is very forward-coming in the work, giving his rider and driver a good feeling, already showing that the work comes easy to him, especially considering his young age.

Central Examination:

Jeppe 537 completed the Central Examination at the age of four.

Training report:

Walk: Jeppe 537 has an active, regular walk that should however be a bit more ground-covering, but he moves with very good use of the body.

Trot: The stallion moves in a light-footed, regular trot with very good bend in the hind leg. Jeppe 537 makes a great front, places his hind leg actively under the body, is good at transitions and places the foreleg well forward. He also shows ample balance and a long moment of suspension.

Canter: Jeppe 537 moves in an uphill canter with very good strides and technique. For his age he shows great capacity for transitions and is good at closing back up again.

Riding horse aptitude:

Jeppe 537 has lots of forward go with a very keen attitude to work, and he likes to make his presence felt. The stallion shows a fine posture with three good basic gaits, with the very good trot and canter particularly catching the eye. Jeppe 537 offers the rider so much to work with and transitions come very easy to him in all three paces.

In-harness aptitude:

In front of the carriage the stallion demonstrates lots of front and forward go. Jeppe 537 has a lot of aptitude for driving- as well as showdriving work, and his active, carrying hind leg and ample forward reach in the foreleg positively stand out. The stallion displays very good use of the body, balance and a long moment of suspension with the in-harness work.

Walk	6.5
Use foreleg	9.0
Use hind leg	9.0
Suspension	8.5
Posture	8.5
Front	8.5
Suppleness	
Impulsion	
Total	93.5

Conclusions Central Examination:

Jeppe 537 has successfully completed his Central Examination. He is very talented for riding horse as well as for driving- and showdriving work. He is always keen to work and handles the work with ease. For his age he already commands very good posture and balance. In all disciplines his good trot and use of the body catch the eye, in driven work he shows lots of front as well as fine use of the hind leg.

Dam line:

Jeppe 537 is a son of 13-year-old Hieke van de Peester Hoeve Star AA (Pier 448). This large-framed and well-kept mare has brought eight foals, with Jeppe 537 being one of her three Star offspring. Hieke has satisfactory noble expression of the head with a light head-neck connection and a long, vertical neck. Her shoulder is long and somewhat steep, her topline and loin section are strong. Hieke's croup has satisfactory length but is pretty sloping. The mare has a horizontal build with correct stance of legwork and generous size of feet. The mare's regularity in the walk is satisfactory but the walk would benefit from a bit more power, although it shows satisfactory scope. The trot is roomy, powerful and with a long moment of suspension and a hind leg that shows lots of bend.

Final conclusion:

Jeppe 537 is a longlined, all-round stallion. He has very good work ethos by nature, lots of balance and shows fine use of the body.

Advice for use:

Jeppe 537 can be used for mares with correct stance of legwork and satisfactory scope in the walk. He is expected to add a lot of technique in trot and canter. The stallion is also expected to improve use of the body and pass on longlined, uphill conformation.

november 2023

Watch the video:

Studbook name: Naud T. van Sessing **Life number:** 202000045 **Breeder:** Familie Tanck, Vragender **Date of birth:** 1 February 2020 **Height at withers:** 1.66 metres **Lineage:** Tiede 501 x Model Sport AA Bartele 472 x Ster Folkert 353 x Ster Pref*4 Goffert 369 x Ster Pref*6 Prest Djurre 284 x Ster Tsjalling 235 **Pedigree:** 50 **Kinship:** 18,5 % (average 17,8%)

Exterior:

Breeding type: Nyk 538 is a breed-typical stallion with lots of front and the head has satisfactory noble expression. He slightly lacks length in poll and neck but has a vertical neck which rises a little heavy from the chest.

Conformation: Nyk 538 stands in a bit of a square model with an uphill build and satisfactory length in the foreleg. He has a sloping shoulder and a strong topline with correct croup conformation that has satisfactory length.

Legwork: Stance of forelegs and hind legs is correct. Nyk 538 has dry and clean legwork but his feet should be a little bigger.

Estimated breeding value exterior:

Reliability	35-40%
Breeding type	112
Conformation	115
Legwork	111
Walk	106
Trot	106
Canter	102

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, good

Observations stable manager, riders and drivers:

Nyk 538 is a polite and intelligent stallion who is very affectionate and thoroughly enjoys attention. The stallion is a joy to work with and shows satisfactory zest for work, but needs to develop more power. He is still a bit youngish during training sessions and easily tires.

Central Examination:

Nyk 538 completed the Central Examination at the age of three.

Training report:

Walk: Nyk 538 has an active and roomy walk in which he moves with functional use of the hind leg.

Trot: The stallion moves in a light-footed, regular trot with very good bend in the hind leg. Nyk 538 steps actively under his

body with his hind legs and is good at T transitions, but he needs to develop more R reach in the foreleg. V

Canter: In canter Nyk 538 moves with uphill and satisfactory strides. In the course of the training he has developed more balance and has become stronger.

Riding horse aptitude:

Nyk 538 possesses a roomy and regular walk and a trot with good use of the hind leg. He must learn to move with more balance in canter but thanks to his willingness to work and his cooperative character he has good aptitude for riding horse. Nyk 538 moves with a fine contact and responds well to rider aids.

In-harness aptitude:

The stallion has aptitude for both drivingand showdriving work, showing lots of front and forward go in the harness. Nyk 538 moves with a strong and active hind leg, is good at transitions and the moment of suspension is satisfactory. He has lots of go and zest for work and is easy to train for the driver.

Walk	7.0
Use foreleg	7.5
Use hind leg	8.0
Suspension	7.5
Posture	7.5
Front	8.0
Suppleness	
Impulsion	7.5
Total	

Conclusions Central Examination:

Nyk 538 has successfully completed his Central Examination. He is very talented for riding horse as well as for driving- and showdriving work. He is keen to work but still somewhat youngish, which is why he lacks power and balance at this stage. Under saddle his good walk catches the eye, in driven work he shows lots of front as well as fine use of the hind leg.

Dam line:

Nyk 538 is a son of the 9-year-old Vrouwkje T. van Sessing Model Sport AA (Bartele 472). The mare has in total brought four foals with Nyk 538 being her second offspring. Vrouwkje is a longlined and big-framed mare with good proportions and lots of front. She has a slightly longish but expressive head. The mare has satisfactory length in the neck which shows satisfactory vertical conformation. Her head-neck connection could be a little lighter. Vrouwkje's shoulder is a fraction steep but has satisfactory length, the topline is strong. In front the legwork is a little toeing-in and the hind legs are a little sickle-hocked. Vrouwkje's leqwork shows satisfactory dry quality but her feet might have been a little bigger. Vrouwkje displays good rhythm in walk with satisfactory engagement from the hind leg and satisfactory power. The mare trots with good impulsion and lots of bend in the hind leg and placing of the hind legs under the body is satisfactory. Vrouwtje demonstrates very good capacity for transitions and suppleness in trot. Vrouwtje obtained her Sport predicate on account of five winning points in the Z1 and in her IBOP she wrote 77 points to her name.

Final conclusion:

Nyk 538 has performed consistently throughout the Central Examination. Both under saddle as well as in the harness the stallion has great zest for work and is a joy to work with. In the course of the test Nyk 538 has improved in power and balance.

Advice for use:

Nyk 538 stands out with his very good walk which he is expected to pass on in breeding. The stallion is best used on mares with satisfactory length of neck without being too heavy in the front. Nyk 538 is expected to contribute to breed expression and to improve work ethics.

Martinus 539

Stallion Information

november 2023

Watch the video:

Studbook name: Melle "van de Brink" **Life number:** 202000114 **Breeder:** Familie Nooteboom-Scholte, Vegelinsoord **Date of birth:** 20 February 2020 **Height at withers:** 1.66 metres **Lineage:** Tiede 501 x Ster Sipke 450 x Ster Heinse 354 x Ster Pref*5 Teake 273 x Ster Naen 264 **Pedigree:** 138 **Kinship:** 17,8 % (average 17,8%)

Exterior:

Breeding type: Martinus 539 is a stallion with satisfactory breed expression and satisfactory noble quality of the head. His head-neck connection is a little heavy and the neck has satisfactory length but rises somewhat deep from the chest.

Conformation: Martinus 539 is a stallion with a strong topline but we would like to see a slightly stronger connection with the loin section. The croup has satisfactory length and is lightly sloping. Body shape is somewhat downhill and he could have been a little more longlined.

Legwork: The stallion has satisfactory length in the foreleg and stance of both forelegs and hind legs is correct. The stallion's legwork is dry and clean with good size of the feet.

Estimated breeding value exterior:

Reliability	34-40%
Breeding type	111
Conformation	
Legwork	110
Walk	105
Trot	105

DNA-testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 2, acceptable

Observations stable manager, riders and drivers:

Martinus 539 is a nice and trainable horse who always shows zest for work and who has strongly improved in the course of the examination. The stallion has a slightly reserved attitude in the yard. He is a little apprehensive and a bit wary of new people and unfamiliar things.

Central Examination:

Martinus 539 completed the Central Examination at the age of three.

Training report:

Walk: The stallion has an easy walk; roomy and regular with lots of use of the body.

Trot: In trot Martinus 539 moves with self-carriage, power and impulsion. He has good suppleness, is good at transitions and moves with active use of the hind leg.

Character/personality:		а	b	с	d	е	
Stable manners	difficult					х	pleasant
	energetic					х	calm

Test results showdriving test:

Walk	7.5
Use foreleg	7.0
Use hind leg	8.0
Suspension	7.5
Posture	
Front	7.5
Suppleness	7.0
Impulsion	7.5
Total	81.0

Conclusions Central Examination:

Martinus 539 has completed his Central Examination with good results. During his training sessions he demonstrated to be very hardworking with a lot of go and throughout the test he has shown progress, especially in developing more power.

Dam line:

Martinus 539's dam is the 10-year-old Sjoukje 'van de Brink' Star (Sipke 450), a mare with five offspring to her name, two of them with the Star predicate. The somewhat shy and skittish Sjoukje goes through life as a broodmare. She is breed-typical with a thick tail, a long mane with a long forelock too, an expressive head and her coat colour is jet-black. The mare has a long, slightly heavy neck with horizontal neck conformation. Sjoukje has a slightly downward build, could be a little stronger in the back and has a somewhat steep shoulder and a rounded, sloping croup. Her legwork should show more durability. She is back in the knee and standing-under in the foreleg, stance of the hind leg is correct. Her walk has satisfactory scope and rhythm, but the foreleg is slightly toeing-in in movement. Her trot shows satisfactory rhythm with active use of the hind leg but she should be more uphill in movement.

Final conclusion:

Martinus 539 is a breed-typical stallion with a strong build. It is an all-round stallion with three correct basic gaits and aptitude for all three disciplines. The stallion has a strong walk, shows good balance and bend in the hind leg and uses his body with ease.

Advice for use:

Martinus 539 can be used on well-developed, longlined mares that don't have too much slope in the croup. The stallion is expected to add good use of the hind leg and contribute work ethics and trainability. The stallion is extra interesting because of the lineage in his dam line.

Canter: In canter he moves with good strides and impulsion, moving in an uphill frame.

Riding horse aptitude:

Martinus 539 demonstrates good natural balance and fine use of the body. He is good at transitions, showing active use of the hind leg. This stallion is an all-round utility horse with lots of go and zest for work.

In-harness aptitude:

Martinus 539 has more than satisfactory aptitude for driving work and satisfactory talent for showdriving. In driven work he moves with satisfactory front and easy use of the body as well as good bend in the hock. He displays a long moment of suspension but needs to develop still more forward reach in the foreleg. For showdriving he should convince more with his front and posture and he can be a bit unyielding in the rider contact.

november 2023

Watch the video:

Studbook name: Meneer M. van de Sprong **Life number:** 202003344 **Breeder:** Fleur van Kempen, Rijkevoort **Date of birth:** 07 March 2020 **Height at withers:** 1.65 metres **Lineage:** Teun 505 x Kroon AA Loadewyk 431 x Ster Pref*5 Jasper 366 x Stb Jorrit 363 x Ster Rypke 321 x Ster Lute 304 **Pedigree:** 115 **Kinship:** 18,0 % (average 17,8%)

Exterior:

Breeding type: Murk 540 possesses satisfactory breed expression. The stallion has a very aristocratic head and satisfactory feathers but would benefit from slightly more poll- and neck length.

Conformation: Murk 540 is a classy stallion of slender build with a youthful expression and slightly downhill body conformation. The stallion has a strong topline with a wide loin section and correct croup conformation.

Legwork: Murk 540 has elegant and dry legwork with matching feet. Stance in the foreleg is correct but hind legs are slightly sickle-hocked.

Estimated breeding value exterior:

Reliability	31-37%
Breeding type	108
Conformation	110
Legwork	108
Walk	105
Trot	107
Canter	105

DNA-testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, good

Observations stable manager, riders and drivers:

Murk 540 is a people-oriented and well-behaved horse, but at the same time noticeably sensitive too. He likes structure and routine. In the work the stallion shows very good work ethics and he is very keen to give his best, so he is very responsive to the aids. From time to time Murk 540 still struggles with his balance but he is very good at transitions and is easy to train.

Central Examination:

Murk 540 completed the Central Examination at the age of three.

Training report:

Walk: The stallion has a regular walk with satisfactory scope. When Murk 540 relaxes the walk becomes more ground-covering.

Trot: The trot is light-footed with good balance and very strong use of the hind leg. Murk 540 moves with fine reach in the foreleg and has good capacity for transitions.

Canter: Murk 540 canters with fine uphill strides and with really good capacity for transitions. Murk 540 already shows good self-carriage in canter and keeps moving in a light-footed and uphill way.

Riding horse aptitude:

Murk 540 is a horse demonstrating lots of zest for work and a good mentality under saddle. His movement is of a remarkably light-footed quality with good capacity for transitions. The stallion possesses a strong and active hind leg showing fine, roomy use of the foreleg, but he needs to develop more suppleness in all gaits.

In-harness aptitude:

Murk 540 has lots of aptitude for showdriving work and satisfactory aptitude for driving work. He moves with ample reach in the foreleg and very good bend in the hind leg, but sometimes still struggles a bit with self-carriage.

Use foreleg	8.0
Use hind leg	8.0
Suspension	7.0
Posture	7.5
Front	7.5
Suppleness	7.5
Impulsion	8.0
Total	83.5

Conclusions Central Examination:

Murk 540 has completed his Central Examination with good results. During training sessions he shows lots of zest for work and forward go and his performances throughout the Central Examination were consistent.

Dam line:

Murk 540's dam is the 11-year-old Meisje P.A. van de Sprong Crown AA (Loadewyk 431). So far this mare has had four offspring with Murk 540 being her only Star offspring. At the age of seven the mare completed an IBOP under saddle with 80 points and four 7.5 scores. She was sold in 2021 and then moved to the United States. Murk 540's granddam is the Preferent Parel Anke March van de Sprong Star (Jasper 366). This 18-year-old mare has ten offspring to her name with five of them having the Star predicate or higher. Parel Anke is the only offspring of Anke March fan 'e Wigéri Star (Jorrit 363), who died of colic at the age of five.

Final conclusion:

Murk 540 is an elegant and youthful, all-round utility horse with great zest for work. The stallion has performed very consistently throughout the Central Examination.

Advice for use:

Murk 540 can be used to add light-footedness and elegance. The stallion is best used on mares with a lot of front. He can also have a positive effect on work ethics and trainability.

Manno 541

Stallion Information

november 2023

Watch the video:

Studbook name: Manno fan Burmania **Life number:** 202000490 **Breeder:** R.A. Faber, St. Nicolaasga **Date of birth:** 19 March 2020 **Height at withers:** 1.66 metres **Aftekening:** Enkele witte haren op het hoofd **Lineage:** Fonger 478 x Ster Pref*4 Andries 415 x Ster Brandus 345 x Ster Pref*7 Hearke 254 x Ster Pref*4 Hotse 223 x Model Pref*5 Eelke 183 **Pedigree:** 22 **Kinship:** 17,7% (average 17,8%)

Exterior:

Breeding type: Manno 541 is a stronglybuilt stallion with satisfactory breed expression. Noble expression of his head is satisfactory and his neck is of satisfactory length but rises a little deep from the chest. The stallion has satisfactory feathers for his age.

Conformation: The stallion's build is slightly downhill and he has a strong topline with a wide and strong loin section. The croup has satisfactory length and is lightly sloping.

Legwork: We would like to see a little more length in the foreleg, but stance of legwork is correct. The legwork is hard and dry but should be a little finer. The stallion has small feet.

Estimated breeding value exterior:

Reliability	35-41%
Breeding type	105
Conformation	105
Legwork	106
Walk	108
Trot	104
Canter	100

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring. **Dwarfism:** non-carrier status **Hydrocephaly:** non-carrier status

Chestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 3, just acceptable

Observations stable manager, riders and drivers:

Manno 541 stands out with his mentality and trainability. The stallion has lots of go and great zest for work. The stallion is quite alert to his surroundings when under saddle but he has no trouble releasing the tension. Manno 541 has very friendly and well-behaved stable manners and is not easily daunted. He is very confident and can be playful.

Central Examination:

Manno 541 completed the Central Examination as a 3-year-old.

Training report:

Walk: In walk Manno 541 moves with good rhythm and scope, but he needs to develop a little more power.

Trot: Manno 541's trot shows satisfactory scope with satisfactory use of the hind leg. The stallion must learn to move with a little more posture as well as suppleness.

Canter: The stallion displays satisfactory technique in the canter, with satisfactory strides and an uphill frame.

Riding horse aptitude:

Manno 541 has a good mentality and presents incredible go and zest for work. The stallion has a good walk and a correct, satisfactorily uphill canter, but Manno 541 needs to develop more selfcarriage and suppleness in all paces.

In-harness aptitude:

Manno 541 presents the same picture in front of the carriage: a powerful walk with a good mentality and ditto trainability. The stallion has little aptitude for showdriving because he moves somewhat downhill in trot and therefore presents little front. Forward reach of the foreleg is satisfactory.

Test results riding test:

Walk	7.0
Use foreleg	7.0
Use hind leg	6.5
Suspension	6.0
Posture	6.5
Front	7.0
Suppleness	6.5
Impulsion	7.5
Total	74.5

Conclusions Central Examination:

Manno 541 is an all-round riding- and driving horse. What particularly catches the eye are his correct walk, his good mentality, his trainability as well as forward go. He must learn to move with more selfcarriage in trot. In all paces he needs to develop a bit more suppleness.

Dam line:

Manno 541's dam is the 19-year-old mare Noor F. Star Preferent (Andries 415) who has in total brought nine offspring, four of these have been declared Star. Manno 541 was her last foal. Noor is a well-behaved, calm mare but she has little durability in conformation. The mare has a noble head and presents lots of front. She has a downhill build with a back that should be a lot stronger and a croup that lacks length. Noor is somewhat standingunder in the forelegs, stance of her hind legs is correct. The feet match the mare and her legwork shows satisfactory dry quality for her age. The mare has a roomy and regular walk.

Final conclusion:

Manno 541 is an all-round utility horse with lots of willingness to work and whose performances during the CE were very constant. Manno 541 is the first approved son for Studbook stallion Fonger 478 Sport AAA.

Advice for use:

Manno 541 can be used to improve work ethics and willingness to work.

november 2023

Menso 542

Watch the video:

Studbook name: Mayson Jede Life number: 202000913 Breeder: Stal Jede, Vledder Date of birth: 04 April 2020 Height at withers: 1.65 metres Lineage: Ulbrân 502 x Model Sport Prest*4 AA Tsjalle 454 x Ster Pref*6 A Jasper 366 x Ster Pref*6 Brandus 345 x Ster Pref*8 Melle 311 x Ster Pref*13 Prest*4 Feitse 293 Pedigree: 50 Kinship: 18,1 % (average 17,8%)

Exterior:

Breeding type: Menso 542 is a stallion with satisfactory breed expression and a youthful appearance. He has a noble head but head-neck connection should be a little lighter. Feathers and length of neck are satisfactory.

Conformation: The stallion's build is slightly downhill but with a strong topline and a wide loin section. His shoulder is sloping and well-placed. The croup is lightly sloping and a bit high in shape but has satisfactory length.

Legwork: Menso 542 is slightly standingunder in the foreleg and the hind legs are a bit sickle-hocked. The legwork is delicate, hard and dry with slightly small feet.

Estimated breeding value exterior:

Reliability	35-40%
Breeding type	110
Conformation	112
Legwork	107
Walk	105
Trot	111
Canter	105

DNA-testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, go

Observations stable manager, riders and drivers:

Menso 542 is a very friendly and wellbehaved stallion, with very polite stable manners. The stallion has very pleasing contact manners but tends to become insecure in unfamiliar or new situations. Menso 542 is a really nice horse to work with in all disciplines and he has abundant mentality, he is already quite good at transitions and can easily release tension.

Central Examination:

Menso 542 completed the Central Examination at the age of three.

Training report:

Walk: The stallion has a regular, roomy and active walk and he moves with good use of the body.

Trot: The trot shows good rhythm as well as good balance and a long moment of suspension. Menso 542 commands good use of the foreleg, strong use of the hind leg and lots of capacity for transitions.

Canter: The stallion canters with uphill strides and lots of capacity for transitions. Menso 542 is good at moving in a closed outline and already demonstrates a lot of self-carriage.

Riding horse aptitude:

Menso 542 possesses very good natural balance and very good mentality. He demonstrates good capacity for transitions with an active hind leg and fine, roomy use of the foreleg. Menso 542 is an all-round utility horse. He moves in a light contact and is very responsive to the rider aids. He is always fully concentrated on the job.

In-harness aptitude:

Menso 542 is very talented for driving work but certainly also for showdriving work. He moves with a satisfactory front and good bend in the hind leg, showing a long moment of suspension. He easily comes back onto the hind leg with good forward reach of the foreleg.

Test results riding test:

Test results showdriving test:

Walk	6.5
Use foreleg	8.0
Use hind leg	8.0
Suspension	8.0
Posture	7.5
Front	7.5
Suppleness	7.5
Impulsion	8.0
Total	84.5

Conclusions Central Examination:

Menso 542 has completed his Central Examination with good results. During his training sessions he demonstrated to be very hardworking with a lot of go and throughout the test he has shown progress, especially in the walk.

Dam line:

Menso 542 is the seventh offspring of Model mare Juwiel H. fan Lutke Peinjum Model Sport Performance AA (Tsjalle 454). Juwiel has successfully competed in the sport in three disciplines. She has earned a winning point in Z2 dressage and several in ZZ driving. This Tsjalle 454 daughter was also doing quite well in showdriving. By now this 12-year-old, longlined mare has already ten offspring to her name, thanks to several embryo transfers. Menso 542 is her third Star offspring. Juwiel is a breed-typical mare with ample feathers and an aristocratic head. She has a light head-neck connection with good length in the neck and a sloping shoulder. Her back is somewhat sunken but is well-connected to the loin section. The croup has satisfactory length with a light slope. The mare has dry and clean legwork with correct stance but is slightly standing-under in the foreleg and the hind leg is a bit straight. Juwiel has a roomy and regular walk and displays an uphill trot with good use of the hind leg.

Final conclusion:

Menso 542 is a stallion with a very good mentality who has continuously shown good performances in the CE. For a 3-year-old stallion he possesses very good natural balance and ditto use of the body.

Advice for use:

Menso 542 can be used to improve work ethics and trainability. He is a good match for mares with satisfactory length in the foreleg and a strong topline. He is expected to add balance and bend in the hind leg. Menso 542 can boast a lot of Preferent blood in his lineage.

Mans 543

Stallion Information

november 2023

Watch the video:

Studbook name: Mans van de Gonda **Life number:** 202001505 **Breeder:** M.A.W. Slagers-Karnebeek, Goor **Date of birth:** 28 April 2020 **Height at withers:** 1.68 metres **Lineage:** Teun 505 x Ster Pref*4 Norbert 444 x Ster Pref*5 Beart 411 x Ster Pref*10 Anne 340 x Ster Pref*4 Oege 267 x Ster Pref*4 Peke 268 **Pedigree:** 13 **Kinship:** 18,7 % (average 17,8%)

Exterior:

Breeding type: Mans 543 is a stallion with satisfactory breed expression. The stallion's head could be a bit more aristocratic but he has a long, vertical neck with a light head-neck connection.

Conformation: Mans 543 is a longlined stallion with an uphill build. He has a strong topline but is somewhat raised in the loin section. The croup has satisfactory length and is lightly sloping.

Legwork: Mans 543 has satisfactory length in the foreleg. Stance of the foreleg is correct, stance of the hind leg is a bit toeing-out and sickle-hocked. Hard and dry quality of legwork is satisfactory, the feet are welldeveloped.

Estimated breeding value exterior:

Reliability	31-38%
Breeding type	108
Conformation	113
Legwork	106
Walk	105
Trot	106
Canter	104

DNA-testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, good

Observations stable manager, riders and drivers:

Mans 543 is a friendly and people-oriented stallion who is very inquisitive and alert to his surroundings. The stallion is a joy to work with in all disciplines but should move with a bit more go and elasticity in the body. Sometimes he has the tendency to shut down a bit when working.

Central Examination:

Mans 543 completed the Central Examination at the age of three.

Training report:

Walk: The stallion has a regular walk with satisfactory scope but in this pace he needs to develop more use of the body.

Trot: Mans 543 trots with satisfactory use of the hind leg and with ample forward reach in the foreleg. Moment of suspension is satisfactory but he should demonstrate more use of the body, suppleness and willingness to work.

Canter: In canter Mans 543 shows satisfactory balance and quality of strides, but he must learn to move in a more uphill frame.

Riding horse aptitude:

Mans 543 struggles with the performance under saddle. He has a strong walk and a satisfactory canter, but he needs to develop more use of the body and suppleness in all paces. The stallion also struggles with his tail carriage.

In-harness aptitude:

Mans 543 has satisfactory aptitude for driving as well as for showdriving. In movement he demonstrates satisfactory bend in the hind leg and satisfactory capacity for transitions, placing the foreleg forward with ample reach and displaying very good stature and selfcarriage. He gives his driver a good feeling and is easy to train, also making progression.

Test results showdriving test:

Walk	7.0
Use foreleg	7.5
Use hind leg	7.0
Suspension	6.5
Posture	7.0
Front	7.5
Suppleness	6.5
Impulsion	7.5
Total	78.0

Conclusions Central Examination:

Mans 543 has completed his Central Examination with good results. The stallion struggled with the under-saddle part but demonstrated a constant, growing line in the in-harness disciplines.

Dam line:

Mans 543's dam is Femcke van de Gonda Star Preferent (Norbert 444), a 14-year-old mare with eight offspring. Considering her age Femcke has kept herself well but overall she might have been a little more bigframed. She is breed-typical with abundant feathers, satisfactory expression of the head and a long, fractionally horizontal neck. The mare shows satisfactory horizontal conformation, she has a strong back with a wide loin section and her shoulder conformation has satisfactory slope and length. Her dry legwork shows satisfactory durability as well as correct stance. Her walk has satisfactory scope and regularity, although she would benefit from a little more reach in the foreleg and more power. She has a spacious trot with good bend and power in the hind leg. Femcke shows good transitions in trot, displaying lots of suppleness and use of the body. Femcke's dam, the 19-year-old Nienke van de Gonda Star Preferent (Beart 411) is also present and appears to be remarkably fit and durable and has her 14th foal at her side.

Final conclusion:

Mans 543 is a breed-typical, correctly-built stallion with lots of youthful expression. The stallion possesses three correct basic gaits and clearly shows to have more talent for the driven disciplines. He has improved in the course of the CE and stems from the first crop of offspring by Teun 505 Sport AAA.

Advice for use:

Mans 543 can be used on mares with a powerful trot and is expected to add youthfulness and correct conformation.

Report Progeny Testing | December 2023

Elias 494

Date of birth: 19 March 2009 Breeder: Demro Stables, Mierlo Owner: Linda Annell, Sundsvall Sweden Lineage: Jorn 430 x Crown Sport Perf*4 AA Maiko 373 x Star Thomas 327 x Fb Tsjerk 328 Pedigree: 109 Kinship: 17.2% Particulars: none

General

Elias 494 was approved via the Short Test as a 7-year-old stallion at the end 2016, on the basis of his dressage qualities such as use of the hind leg, talent for piaffe and passage and canter as well as his good breed expression. A side observation was made that his lineage could be stronger. From his first stud season 56 foals were registered in 2018, with 77% born out of (at minimum) Star mares. Elias 494 completed his Progeny Test in 2023 on the basis of three year collections of 3-, 4- and 5-year-old offspring.

Exterior

The Elias 494 offspring show little uniformity. Across the board they are fairly tall and have above-average breed expression. The breed expression is mainly due to their abundant feathers, noble head expression and a head-neck connection that is satisfactorily light. The necks need more length and should be more vertical. Body shape is a fraction downhill. Shoulder conformation is mostly steep. The horses have a slightly weak back and many are tight in the loin section. The croup is more horizontal than the average of the population of Friesian horses and shows good length. In many offspring the legwork should radiate more quality in terms of dryness. Stance of the foreleg is usually correct, toeing-in sometimes occurs. Stance of the hind leg is straight (steep). The feet and pastern length are average. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Elias 494 offspring have pleasant and calm stable manners and are relaxed when being handled. In ridden work the horses are very reliable and respond well to training. They give good reaction to the aids and have above-average zest for work. In terms of character the Elias offspring present a different picture with the in-harness work. In driven work they tend to be sharp and are sometimes difficult to train. Two out of the 21 offspring tested in the ABFP did not complete the driven part because they were unreliable in front of the carriage.

Movement/Performance

21 of the Elias 494 offspring were tested in the ABFP Test. The age of the tested horses ranged from three to five years old. Two horses obtained an AAA score. The walk is mostly short and should have more expression and some horses need to move with more rhythm. The trot is average in terms of scope and strength. In general, the offspring need to display a bit more use of the body and capacity for transitions. The canter has satisfactory power and scope. Impulsion and rideability of the tested horses are good. Especially under saddle, the Elias 494offspring are very responsive to the aids, are hardworking and not easily distracted. The performances under saddle are noticeably better than the performances in the driven parts of the ABFP Test. The results in the in-parts of the Performance Test are far below average. The Elias 494 offspring have little aptitude for showdriving.

Conclusion

Elias 494 has a slightly below average hereditary profile for exterior in mares and a more than satisfactory hereditary profile for exterior in stallions and geldings (breeding value total 104; Star% mares 26; Star% stallions 50). The offspring have calm and reliable stable manners and show above-average zest for work under saddle. They appear to be less suitable for in-harness work in which they prove to be a lot less reliable. They show satisfactory aptitude in the Performance Test, but some of the horses need to develop more rhythm and scope in the walk (breeding value total 102). Based on the overall hereditary profile Elias 494's stud license will be sustained.

Report Progeny Testing | December 2023

Tjebbe 500

Date of birth: 28 March 2014 Breeder: Livery Stable De Zadelhoff, Breukelen Owner: Livery Stable De Zadelhoff, Breukelen Lineage: Bartele 472 x Star Pref*5 Dries 421 x Crown Pref*5 AA Tsjerk 328 x Model Pref*11 Perf*6 Oepke 266 Pedigree: 2 Kinship: 18.6% Particulars: none

General

Tjebbe 500 was approved in the autumn of 2017 as a 3-year-old stallion, on the basis of his good lineage, his good exterior and good performances. From his first stud season 63 foals were registered in 2019 with 81% born out of (at minimum) Star mares. Tjebbe 500 completed his Progeny Test in 2023 based on two year collections of 3-year-old offspring.

Exterior

The Tjebbe 500 offspring are a uniform group of youthful, satisfactorily developed horses with remarkably strong builds and a good walk and trot. The offspring have noble heads, vertical necks that would benefit from a little more length and they have little feathers. The offspring have uphill body conformation, good length in the foreleg, a strong to tight topline and horizontal croup conformation. The horses have exceptionally dry legwork. The hind leg is sickle-hocked and some have toeing-in stance of the foreleg. The pasterns are long. The feet should have more size. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

he Tjebbe 500 offspring have pleasant and inquisitive stable manners and are satisfactorily relaxed. They show average sensitivity in work and should be more responsive to the aids. Reliability, zest for work, work ethics, trainability and perseverance are clearly below average.

Movement/Performance

In-hand the Tjebbe 500 offspring show a roomy, regular and powerful walk and a roomy, powerful trot with lots of balance and suppleness. From the Tjebbe 500 offspring 19 individuals have taken part in ABFP Tests and one stallion took part in the Central Examination 2022. Under saddle the offspring present average performances and in the harness above-average performances. Five offspring have achieved an AAA score. The still youthful Tjebbe 500 offspring have correct walks but need to move with more scope and shoulder freedom. Under saddle the quality of the walk is better than in front of the carriage. On average, the offspring should display more scope, power and use of the body in the work.

Conclusion

Tjebbe 500 has a good hereditary profile for exterior (breeding value total 110; Star% mares 58%; Star% stallions 54%) and in terms of exterior he is found to strongly improve conformation and legwork. The offspring demonstrate to have good characters both in the yard as well as in the work. In work they clearly need to improve trainability and reliability and have more zest for work and perseverance. They have three correct basic gaits and demonstrate more than satisfactory aptitude in the performance tests (breeding value total 107). Based on the overall hereditary profile Tjebbe 500 is approved on offspring.

Report Progeny Testing | December 2023

Teun 505

Date of birth: 13 April 2014 Breeder: B. Veldhuizen, Putten Owner: T. de Boer, Sintjohannesga Lineage: Bartele 472 x Star Pref*8 Rindert 406 x Model Sport Pref*8 Perf*5 Fabe 348 x Star Pref*12 Perf*3 Feitse 293 Pedigree: 50 Kinship: 18.8% Particulars: none

General

Teun 505 was approved in the autumn of 2018 as a 4-year-old stallion, on the basis of his good lineage, his good exterior and good performances. From his first stud season 130 foals were registered in 2020, with 93% born out of (at minimum) Star mares. Teun 505 completed his Progeny Test in 2023 based on one year collection of 3-year-old offspring.

Exterior

Uniformity of the Teun 505 offspring is satisfactory. They are well-developed horses with correct conformation. The offspring are breed-typical because of their noble heads, light head-neck connections, long necks and abundant feathers. Neck conformation is average. They have remarkably good body shape with good length in the foreleg, strong to tight toplines and long croups with good conformation. Shoulder conformation is mostly steep. The offspring would benefit from more quality in the legwork. The feet should have more size. The pasterns are long. Stance of the hind leg is clearly sickle-hocked and stance of the foreleg is frequently toeing-in. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Teun 505 offspring are inquisitive horses with very pleasant and calm stable manners. They are very relaxed when handled. Reliability in the work is satisfactory. They are not prone to building up tension, sensitivity is average and they are easy to train. They need to develop a bit more zest for work, perseverance and stamina.

Movement/Performance

From the Teun 505 offspring 18 individuals have taken part in ABFP Tests and two stallions in the Central Examination 2023. Both under saddle as well as in-harness the offspring present very good performances. Seven offspring have achieved an AAA score. The Teun 505 offspring present a positive picture in the performances and are especially convincing in trot and canter. They stand out with their trainability, lots of suppleness and impulsion as well as good posture and balance in these paces. They demonstrate to have natural capacity for self-carriage. The long hind leg should however, show a little more bend. The canter has strong strides and is variable in terms of capacity for transitions. The walk is a point of attention and in many cases needs more rhythm, scope and use of the body. When presented in-hand the Teun 505 offspring show satisfactory scope and satisfactory power in the walk. The trot is roomy and remarkably powerful with a lot of balance and suppleness.

Conclusion

Teun 505 has a good hereditary profile for exterior (breeding value total 110; Star% mares 40%; Star% stallions 50%) with a particularly strong improvement in conformation. The offspring demonstrate to have good characters both in the yard as well as in the work. In use they convince in trot and canter with lots of impulsion, balance and suppleness (breeding value total 108). Even though the in-hand walk is satisfactory, this is a point of attention in use. Based on the overall hereditary profile Teun 505 is approved on offspring.

Preliminary Report Progeny Test | December 2023

Mees 497

Date of birth: 10 April 2012 Breeder: M. van Vliet, Koudekerk a/d Rijn Owner: Aftonmora Friesians, Jonstrorp Sweden Lineage: Tymon 456 x Star Perf Dries 421 x Star Pref*5 Oltman 317 x Star Jakob 302 Pedigree: 11 Kinship: 17.5% Particulars: none

General

Mees 497 was approved as a 4-year-old stallion in the autumn of 2016 on the basis of his more than satisfactory lineage, more than satisfactory exterior with a lot of breed expression and good performances in all three disciplines. From his first stud season 48 foals were registered in 2018 with 81% born out of (at minimum) Star mares. Mees 497 completed his Progeny Test in 2023 on the basis of three year collections of 3-, 4- and 5-year-old offspring. By the end of 2023 only 32 of the required 40 offspring had been inspected. So his progeny testing is not yet fully complete.

Exterior

The Mees 497 offspring are a uniform group of horses that need more breed expression and should be more correct in conformation and legwork. Especially in the topline these horses lack connections and elegant outlines. The heads lack noble expression and they should have lighter head-neck connections and have more feathers. Length of neck is average and neck conformation is vertical. Across the board height at withers is satisfactory. Body shape is downhill. Shoulder conformation is sloping. Back and loins are very weak. Croups are average in terms of conformation and length. The offspring have average quality of legwork. Stance of the hind leg is noticeably too sickle-hocked. Stance of the foreleg is quite toeing-in. The pasterns are long and size of the feet is adequate. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/training report

In the yard the Mees 497 offspring are calm, pleasant, inquisitive horses who are relaxed but can also be a bit cheeky and dominant when handled. Reliability in the work is satisfactory, the horses are sensitive, a little too easily distracted and should volunteer more zest for work. They have satisfactory perseverance and stamina.

Movement/performance

From the Mees 497 offspring 20 individuals have taken part in ABFP Tests. The age of the tested horses ranged from three to five years old. Both under saddle as well as in driven work the offspring clearly display below-average performances. One offspring acquired an AAA score. The walk is mostly short and should have more expression and some horses also need to move with more rhythm. The trot is average in terms of scope and strength. The canter shows satisfactory scope and power but they should move with more use of the body and more rise in front. Across the board, the offspring need to display more suppleness and capacity for transitions. Impulsion and rideability of the tested horses are clearly below average. The Mees 497 offspring have little aptitude for showdriving.

Conclusion

Mees 497 presents a clearly below-average hereditary profile for exterior (breeding value total 97; Star% mares 29; Star% stallions 33%) and a strongly below-average performance test result and is therefore considered to have a negative influence on breeding. His percentage of not accepted mares is remarkably high. The offspring have toplines that are too weak and they show too much deviation in stance of legwork. The offspring have calm and reliable stable manners but contact manners tend to be somewhat cheeky and dominant. They show little zest for work and suppleness in ridden- as well as driven work. Due to an unsatisfactory hereditary profile Mees 497 was put on hold in April 2023 after completion of his Performance Test. At that time 24 offspring had been inspected. By the end of December 2023 in total 32 of the required 40 offspring had been inspected. The hereditary profile remains unsatisfactory. Mees 497's stud license remains on hold.

Report Progeny Testing | December 2023

Matthys 504

Date of birth: 28 April 2012 Breeder: Stan Derksen, Oosterhout Owner: Van Manen Brothers, Ede Lineage: Norbert 444 x Star Pref*5 Beart 411 x Star Krist 358 Model AA x Leffert 306 Pedigree: 2 Kinship: 19.2% Particulars: none

General

Matthys 504 was approved as a 6-year-old stallion in the autumn of 2018 on the basis of his more than satisfactory, good lineage, good exterior and a very good performance with a lot of aptitude for all disciplines. From his first stud season 120 foals were registered in 2020, with 77% born out of (at minimum) Star mares. Matthys 504 completed his Progeny Test in 2023 based on one year collection of 3-year-old offspring.

Exterior

Uniformity and development of the Matthys 504 offspring is satisfactory. The offspring are breed-typical thanks to their satisfactorily noble heads, light head-neck connections and very long necks, mostly with vertical builds. They have little feathers. Body shape is average with good length in the foreleg. The offspring have little development in the withers and the backs are often weak. Strength of the loin section is satisfactory. The croup is long with satisfactory horizontal build. The horses have dry legwork. They have generous-sized feet and the pasterns are long. Stance of the hind leg is clearly sickle-hocked and in some offspring stance of the foreleg is toeing-out. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Matthys 504 offspring have pleasant, calm but slightly dominant stable manners and are relaxed when being handled. Reliability and sensitivity in the work are satisfactory but they are prone to building up tension. They give good reactions to the aids and have lots of zest for work, perseverance and stamina. They tend to be a little flighty too.

Movement/Performance

When presented in-hand the Matthys 504 offspring show a powerful walk with satisfactory scope. The trot is roomy and powerful with a lot of balance and suppleness. From the Matthys 504 offspring 20 individuals have taken part in ABFP Tests. They show above-average performances under saddle as well as in driven work. Two offspring achieved an AAA score. The Matthys 504 offspring present a variable picture in terms of rhythm and regularity in the walk. They need to develop more scope and use of the body in walk. In trot the offspring display good posture but they lack natural capacity for self-carriage. Their vertical build of the neck slightly disguises the overall picture. In canter too they lack power, they depend a lot on speed. They need more suppleness and capacity for transitions. Three of the tested horses were found to have a deviation in functional movement of the foreleg. They score well on impulsion and rideability. They must learn to move with a more constant rider contact.

Conclusion

Matthys 504 is found to have a more than satisfactory to good hereditary profile for exterior (breeding value total 109; Star% mares 47; Star% stallions 45%). The offspring should be stronger in the connections. In the yard the offspring are relaxed but tend to be a little dominant. In the work they show lots of zest for work and are sensitive but easily tense up. In use they demonstrate a lot of posture and should show more self-carriage (breeding value total 108). The walk needs attention. Based on the overall hereditary profile Matthys 504 is approved on offspring.

Stallion family-tree KFPS-studbook stallions | December 2023

In this overview the KFPS-studbook stallions are displayed in 4 studs lines:

Age, Ritske, Jarich and Mark. The outline only include the stallions that currently have a covering license or in the direct male line of an active Stallion arise or are the maternal grand dam of an active studbook Stallion. In parentheses the Mareline from which a Stallion results is displayed as well as the maternal grand dam and the maternal great grand dam. The current, living and available studbook stallions are indicated in blue.

Uitblinker in souplesse

Paardensportcentrum Marum stelt ter dekking GOSSE~526

Nane 492 x Beart 411 x Leffert 306 | 1.68m

Met Gosse 526 is fokken geen gokken. Niet alleen beschikt Gosse over een zeer goed exterieur en interieur. Maar ook de zeer predicaat rijke moederlijn van Gosse zorgt dat dit goed verankerd ligt in de genen van Gosse en zijn nakomelingen. Getuigen van zijn goede resultaten van eerste jaargang veulens die zowel op de stamboek keuringen als op fokdag keuringen meerdere kampioenen leverde.

Gosse 526 is vrij van vos-, dwerg-, en watergen

Kruisweg 112 9363 AG Marum Radboud Kulsdom +31653254087 Natasja Scholten +31625411727 Dek voorwaarden

Gosse 526 is worldwide available through frozen semen

Fryso 518

Hessel x Jisse x Anton x Doeke 1.67 m. verwantschap 17,5%

Door zijn relatief lage verwantschap op de totale populatie, kan sporthengst Fryso 518, zeer interessant zijn voor uw merrie!
