

## Stallion information 2025

# Stallion information 2025

We provide the Stallion information 2025 as a tool to help with stallion choices.

Opting for the best-quality stallions when choosing a stallion is not the only key factor to be considered, making correct pairings is even more important. The KFPS strives to provide as much data as possible regarding hereditary aspects of stallions.

## Which stallions?

The 2025 edition lists all living and active stallions with a breeding permit. Deceased stallions are not listed but for some of them frozen semen is still available. Please check the website for information or get in touch with the stallion station.

## Exterior breeding values

When looking at breeding values for exterior it must be taken into account that the data of young stallions does as yet not include information about their offspring. These breeding values are based on lineage information and exterior assessment (linear score) of the stallion himself. For stallions that have completed progeny testing the breeding values are almost completely based on inspection data (linear scores) and ABFP data of offspring. The reliability of breeding values for young stallions is still low. This means that their breeding values are more likely to change (when more offspring are inspected or tested) than in the case of older stallions with a high reliability index. Because of the lower reliability of breeding values for young stallions, these are compiled based on a more reserved estimate and are therefore closer to the breed average (100).

## Which characteristics?

The following characteristics of stallions are listed:

1. Breeding values (linear) exterior characteristics
2. Breeding values for movement/sport aptitude (based on aptitude tests)
3. Breeding values for character
4. Breeding values for sport (based on competition sports)

picture of the horse's exterior that is as complete as possible.

The linear characteristics are divided into two entities:

Optimum characteristics: characteristics with the average score (25) or breeding value (100) being the most favourable. Examples of such characteristics are: back conformation and hind leg conformation. Maximum characteristics: characteristics based on the principle of: the higher the better (e.g. expression of the head, movement expression etc.), or characteristics where the optimum clearly lies above the average like neck conformation and shape of the feet. The differences are visually recognisable because the breeding values for maximum characteristics are represented in dark-blue bars (favourable) and red bars (unfavourable) and breeding values for optimum characteristics in light-blue bars. In addition to the 27 linear characteristics the overview lists one measured characteristic, which is height at withers.

## The rating exterior characteristics

In addition to the 27 linear exterior characteristics, scoring is also done for 5 rating characteristics: breeding type, conformation, legwork, walk and trot. Whereas linear characteristics are mere descriptions, the rating characteristics are evaluative. For the assessment of the rating exterior characteristics the related linear characteristics play an important role. The rating characteristics are scored within the range of 4 to 9. Since 2016 the marks for rating characteristics that are scored in the context of upgrading are also included in the breeding value estimate. Additionally, since 2017 the lower bar figures scored in the classes for Star mares are also included in the breeding value estimate.

## Reliability

The degree in which the breeding value gives an accurate picture of a stallion's true genetic aptitude is expressed in the reliability estimate (btbh.). Reliability is chiefly influenced by the number of inspected offspring. Breeding values with a low reliability can still change considerably when more offspring are inspected. Reliability can be interpreted as follows:

btbh.	interpretation
< 70%	moderate reliability
70-80%	reasonable reliability
80-90%	good reliability
>90%	very good reliability

To be eligible for publication, the reliability of every breeding value has to be 30% or more.

## Movement and sport aptitude

The breeding values for the movement characteristics walk, trot and canter are computed on the basis of the scores for walk and trot in the exterior inspection and the scores for walk, trot and canter from the aptitude tests (ABFP and IBOP). The higher the number of offspring whose information is collected from the aptitude tests, the smaller the influence of in-hand movement will be for breeding values. In case of large numbers of offspring and the information derived from their aptitude tests, the influence of in-hand movement even becomes virtually zero. The reason for this being that movement in the aptitude tests (under saddle and in harness) is closer to the breeding goal than in-hand movement.

## Character

Breeding values for character are being included since the 2020 edition. This information stems from the twenty offspring in the ABFP Tests that are scored on character by the rider team. The published character/personality characteristics are: reliability/predictability; trainability; willingness to work and stamina.

## Sport (competition sports)

Starting with the 2023 edition, the breeding values for sport based on sport data are also listed. The information is provided by the KNHS and the highest known results for dressage and driving dressage are used. The reliability is still low and the degree of heredity small. For the future the intention is to also add the international sport data from the Sport Federation FEI and the results in showdriving sports.

## The estimation model

The breeding values, estimated by CRV, are estimated with a so-called estimation model. The estimation model indicates which of the factors influencing the differences between (in this case) stallions are subjected to corrections. The exterior scores are corrected for the following effects: breeding value of the offspring's dam, age at the moment of inspection, gender; Jury member and inspection. This correction is carried out in order to produce the clearest possible picture of the degree in which the differences between batches of offspring are caused by a difference in genetic aptitude of the stallions. Because of these corrective factors it basically does not matter if one stallion is paired to higher-quality mares than others. The type of estimation model used is the so-called animal model. Along with data of offspring, animal models also include information of relatives. The contribution of this information decreases as the available information of offspring rises.

## Interpretation of breeding values

Breeding values are set at an average of 100 with a range of 4 points on either side. This basis was fixed at 2006. The average breeding values of all horses born in 2006 were fixed at 100 for every characteristic and the range (standard deviation) of these breeding values was fixed at 4. Breeding values with a deviation in relation to 100 of one time the range (between 96 and 104) have to be considered as being average. Over 2/3 of breeding values are found in this area. It is self-evident that the larger the deviation from 100, the bigger the expected effect will be. A stallion with a breeding value of 109 or higher for say, movement expression, ranks with the best 2% of stallions in the population. With a breeding value higher than 112 this is 0.1%. The breeding values for total-exterior and total-movement are the average of the underlying characteristics (breeding type, conformation and legwork respectively walk, trot and canter), multiplied by 1.25 in order to achieve a range of 4 for the total-breeding values.

## Description of breeding values

The breeding values are depicted by 'bars' per individual characteristic. As pointed out, the maximum characteristics are printed in dark-blue (favourable) and red (unfavourable) and optimum characteristics in light-blue bars. For optimum characteristics, (extreme) deflections to the left or right represent an unfavourable picture, here 100 is the optimum.

Summarising: bars to the left are usually unfavourable and bars to the right are favourable, except for the light-blue bars.

## Use of breeding values

The breeding values for exterior are an excellent tool for making the right pairing combination. The way to do this is by checking the mare's linear score form for aspects that should be corrected. If the characteristic that needs to be improved is a maximum characteristic then a stallion must be selected who has a (distinctly) positive hereditary profile for passing on this characteristic (bar to the right). If it is an optimum characteristic then the best choice would be a stallion with a (light) deviation in the opposite direction, depending on the mare's score.

## Use of breeding values for sport aptitude

As you can see there are estimates for breeding values of basic gaits in the exterior bar and in the sport aptitude bar. The first is based on the assessment of basic gaits in the inspection ring

## Explanation breeding values

Considering the complexity of breeding value estimates for exterior characteristics and sport aptitude, it is necessary to provide an explanation about how these figures are compiled and how they should be interpreted. This explanation pays attention to how these figures can be used for stallion choices.

## The linear exterior characteristics

The breeding values for the exterior characteristics are based on the linear scores which, since 1993, are being recorded at the moment of acceptance of horses in the Studbook. Scores ranging between 5 and 45 are recorded for 25 exterior characteristics, with the average being 25. In the case of linear characteristics we are strictly dealing with observations and not evaluations. The choice of characteristics is such that the linear report provides a

Met Gosse 526 is fokken geen gokken.  
 Niet alleen beschikt Gosse over een  
 zeer goed exterieur en interieur.

Maar ook de zeer predicaat rijke moederlijn van  
 Gosse zorgt dat dit goed verankerd ligt in de genen  
 van Gosse en zijn nakomelingen. Tijdens de Centrale  
 Keuring 2024 tekende Gosse voor 3 van de 5 veulens  
 in de kampioensring. Met als resultaat;

*Bertina fan de Marrewyk - Kampioen*  
*Andel R - Reserve Kampioen*

Gosse 526 is vrij van vos-, dwerg-, en watergenen.

## Wiebert 527 (Maiko 373 x Brandus 345)

Though numbers were small, South Africa-based **Wiebert 527** presented a uniform group of longlined foals with satisfactory development, although they should convince more in the walk. For the interpretation of these data people have to factor in that not many foals were inspected and the percentage of Star mares was low. The foals have satisfactory breed expression and satisfactory expression of the heads, but convex, Roman noses also occur. The head-neck connection is heavy, the often heavy necks should have more length and neck conformation varies.

The longlined and sufficiently high-legged foals mostly have downhill body shape. Shoulder conformation is average, the backs are weak, the loin section shows satisfactory connection. The croups mostly have sloping conformation, the length varies.

Correctness of foreleg and quality of legwork varies, stance of the hind leg is clearly sickle-hocked.

The walk is short and often lacks rhythm. Expression of the walk shows satisfactory (average) power.

The picture in trot varies, the trot often displays a high rhythm. The foals should clearly demonstrate more suppleness and some struggle with rhythm.

Dams % Star	83%
Markings allowed	0
Markings not allowed %	0%
Markings not allowed	0
Markings not allowed %	0%

With his first year collection of foals **Hildwin 528** presented a group of breed-typical foals. His foals are well-developed, sufficiently high-legged and longlined. The Hildwin 528 foals show outstanding breeding type with remarkably noble heads and long necks of good vertical build, occasionally an under-neck is seen. The head-neck connection is mostly heavy.

The foals have downhill body shape. They are sufficiently high-legged. Shoulder conformation varies. The topline should be slightly more closed and the back a bit stronger. The loin section should also have a stronger connection. Croup conformation is sloping and the croup has satisfactory length.

Across the board, the legwork radiates good quality. Correctness of foreleg is slightly wanting, toeing-in frequently occurs. Stance of the hind leg is often sickle-hocked.

In trot they present a uniform picture. Generally, the foals walk with more than satisfactory length of stride and satisfactory power. They also demonstrate a purposeful walk with very good rhythm.

The trot is mostly roomy. In terms of power the foals present a variable picture in trot, in which they should present a more uphill outline and place the hind leg further forward under the body. The suppleness in trot positively catches the eye.

Element	Characteristic	Average score	Clearly present					Characteristic

Average score / characteristic	Positive
Breed average / satisfactory	Wide range in hereditary profile
Point of attention	

# Hilbert 529 ( Haike 482 x Stendert 447 )

JACOB MELIJSSEN

Statistics – Hilbert 529	
Number of linear scored foals	23
Born foals	107
Stillborn / early death	0
% Stillborn / early death	0%
Inspected	30
% inspected versus born	28%
1st premium	3
2nd premium	22
3rd premium	5
None	0
% 1st and 2nd premium	83%
Dams >= Star	24
Dams % Star	80%
Markings allowed	2
Markings allowed %	1.9%
Markings not allowed	2
Markings not allowed %	1.9%

With his first foal collection **Hilbert 529** has presented a group of sufficiently longlined and well-developed foals that are sufficiently high-legged. In terms of exterior (breeding type, conformation and legwork) the foals present a uniform picture. In movement however, we would prefer to see a more uniform picture. In proportion to the number of foals born, rather few Hilbert 529 foals were inspected.

The Hilbert 529 foals have good breeding type with strikingly aristocratic heads, necks with satisfactory length and good vertical conformation. Across the board the head-neck connection should be a little lighter.

The foals have average body shape. Slope in the shoulder is satisfactory. The topline should be slightly more closed and the back and loin section should be a bit stronger. Croup conformation is generally sloping but varies quite a bit. The croups have ample length.

The legwork radiates lots of quality and is generally clean and dry. Stance of the foreleg is sufficiently straight. Some foals have a toeing-in stance. In the hind leg they are slightly sickle-hocked.

The walk shows a wide range both in length of the walk as in expression of the walk. Especially with expression of the walk we see foals with a powerful walk and a similar number of foals that need to develop more strength. A few foals struggled with the rhythm.

The trot is generally roomy with satisfactory power. Notably in body posture and suppleness the foals present a variable picture. Placing of the hind leg under the body is however, mostly satisfactory.

With his first year collection of foals **Hielke 530** presented a group of foals with satisfactory development. In terms of exterior the foals present a variable picture. Except for a few characteristics, the picture in movement is more uniform. In proportion to the number of foals born rather few Hielke 530 foals were inspected. For the interpretation of this report people have to factor in that the percentage of Star mares used was below average.

The Hielke foals present satisfactory breeding type. Expression of the head is a bit variable, some have slightly longish faces. Across the board the foals have long necks that show satisfactory vertical stance. The head-neck connection shows considerable variation.

The foals have downhill body shape. On average, the frame is satisfactorily longlined but this characteristic as well as length of the legwork is variable. Shoulder conformation is predominantly sloping. The topline should be more closed and have a better connection with the loin section. On average, the croups are satisfactory in terms of conformation and length but again, there is considerable variation.

The legwork radiates lots of quality. It is predominantly fine, clean and dry. Stance of the foreleg is sufficiently straight. Some foals have a toeing-in stance. The hind leg is sickle-hocked.

In walk they present a uniform picture. Both length of the walk and expression of the walk are satisfactory with mostly average scores. The foals walk with good rhythm and regularity.

The Hielke 530 foals trot with good ground-coverage and display good power of the hind leg in trot. In body posture, suppleness and use of the hind leg the foals present a variable picture. Use of the foreleg positively catches the eye.

EQUIGENIEK

With his first foal collection **Kees 531** has presented a group of well-developed and longlined foals with lots of front. They have a strikingly good trot and the percentage of 1st premium foals is high. The foals scored remarkably well on breed expression. In proportion, many foals appeared at inspections.

Expression of the head presents a somewhat variable picture but is generally aristocratic. A slightly longish face occurs from time to time. The necks are long with a vertical build. In most cases the head-neck connection shows satisfactory lightness, but the foals would benefit from a bit more length in the neck. Side observation is that relatively many foals appear to have an under-neck with the neck rising a little deep from the chest.

The foals are well-developed and noticeably longlined. In spite of their long-legged build body shape is average to downhill. Shoulder conformation is sloping. A fair few foals would benefit from a more closed topline. A somewhat weak back and loin section appeared with some regularity. Croup conformation is largely sloping and with average length.

The legwork radiates good quality. Stance of the foreleg is mostly correct. Some foals have a toeing-in stance. Stance of the hind leg is sickle-hocked. A number of foals are more than average cow-hocked.

The walk varies considerably in expression. On average the foals walk with satisfactory ground-coverage but again, there is quite a bit of variation. Some foals struggled with rhythm.

The Kees 531 foals possess a noticeably good trot. The trot is roomy and powerful with lots of shoulder freedom and good forward reach in the foreleg. The foals demonstrate lots of suppleness and capacity for transitions. The hind leg is placed far forward under the body.

Markings not allowed %	0%

With his first collection of foals **Jorke 532** presented a group of well-developed, longlined and breed-typical foals who have strong connections. The foals have good breed expression with aristocratic heads. The necks are long with a vertical build. The head-neck connection is average.

The Jorke 532 foals have satisfactory body shape. They are satisfactorily high-legged. Shoulder conformation is sloping. They have good, closed toplines. The foals have backs of satisfactory strength with well-shaped loin sections. The croup is sloping with satisfactory length.

The legwork ranges from satisfactory to lots of quality. Stance of the foreleg is mostly straight. Some foals have a toeing-in stance. Stance of the hind leg is a little sickle-hocked.

In walk the foreleg is generously placed forward, combined with satisfactory to ample power from the hind leg. The walk is purposeful with a lot of rhythm and regularity.

The trot is roomy, with good forward reach of the foreleg. The trot is powerful. Placing the hind leg under the body is satisfactory. In trot the foals display satisfactory to good body posture as well as satisfactory to good suppleness.

With his first year collection of foals **Jimte 533** presented a group of well-developed and longlined foals. The foals radiate lots of breed expression and the trot shows lots of scope, power and suppleness.

The foals are very breed-typical, flaunt strikingly aristocratic heads and have a long, vertical neck. The head-neck connection is light with good length of poll. The foals move with a lot of front.

The generally correctly-built and satisfactorily longlined foals would benefit from a more uphill outline. The legwork is satisfactorily high-legged. Shoulder conformation is sloping. The topline should be more closed and have a better connection with the loin section. The croups are sloping and range from satisfactory to good length.

The legwork is clean and dry and therefore radiates lots of quality. Quite frequently stance of the foreleg is a fraction toeing-in. Stance of the hind leg is generally a little sickle-hocked.

The foals display a wide range in length of stride in walk, from short to roomy. Expression of the walk ranges from satisfactory to average. In walk the foals move with satisfactory rhythm.

The trot is roomy, with good forward reach of the foreleg. The foals trot with good power from the hind leg and demonstrate lots of suppleness. They combine this with satisfactory posture, but with a lot of variation between foals. The hind leg shows a variable picture but is largely placed sufficiently forward under the body.

With his first year collection of foals **Kanne 534** presented a large group of foals. It is a collection of well-developed and longlined foals that are satisfactorily high-legged. In terms of exterior and movement the foals present a somewhat variable picture regarding several elements.

The Kanne foals have more than satisfactory breeding type, with noble heads that are sometimes a fraction longish. Both horizontal as well as vertical conformation of the neck occurs. The necks are generally long. The head-neck connection shows a fair bit of variation.

The topline should be slightly more closed and the back a fraction stronger. On average, connection of the loin section is satisfactory but we see a lot of variation in this aspect. Croup conformation is sloping with satisfactory to good length. There is also a wide range in shoulder conformation.

The legwork is generally clean and dry and radiates lots of quality. Toeing-in stance of the foreleg frequently occurs. Stance of the hind leg is sickle-hocked.

Length of stride in walk is mostly roomy. On average, expression of the walk is satisfactory, but shows a relatively wide variation from weak to powerful. The foals move with satisfactory rhythm.

The trot is roomy, but the hind leg should be placed further forward under the body with a bit more power. In terms of suppleness the foals present a variable picture. The foals trot in an uphill outline.

# Nisse 544

## Stallion Information

november 2024

Watch the video:

SANDRA NIEUWENDIJK

**Studbook name:** Nisse T. fan 'e Boppelânnen **Life number:** 202000896 **Breeder:** R. and J. Tjeerdsma **Date of birth:** 6 April 2020 **Height at withers:** 1.67 metres **Lineage:** Omer 493 x Crown Sport Pref\*11 Perf A Fabe 348 x Model Pref\*5 Perf Feitse 293 x Star Pref\*7 Perf Naen 264 x Model Pref\*6 Nuttert 200 x Model Pref Geert 184 **Pedigree:** 050 **Kinship:** 16.3 % (average 17.8%)

### Exterior:

**Breeding type:** Nisse 544 is a breed-typical stallion with abundant feathers. He has a noble head with a slightly heavy head-neck connection but with satisfactory length in the poll. Conformation of the neck is vertical with satisfactory length.

**Conformation:** Nisse 544 is satisfactorily long-lined with lots of front, body shape is a little downhill. The neck has satisfactory length with good conformation, he is somewhat weak in the mid-section but use of his back in movement is good. The croup is long and lightly sloping.

**Legwork:** Stance of the foreleg is correct and straight. The hind leg is a little puffy and slightly sicklehooked but the joints are well-developed.

### Estimated breeding value exterior:

Reliability.....	36 - 46%
Breeding type.....	104
Conformation.....	106
Legwork.....	107
Walk.....	107
Trot.....	108
Canter.....	104

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status
<b>Hydrocephaly:</b>	non-carrier status
<b>Chestnut factor::</b>	non-carrier status
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	acceptable

### Observations stable manager, riders and drivers:

Nisse 544 is a friendly and affectionate stallion, very people-minded but a little shy. He is inquisitive, happy and keen to work. The stallion shows great zest for work, reacts sharply to the aids and gives rider and driver a good feeling.

### Central Examination:

Nisse 544 completed the Central Examination at the age of four. His musculature has increased during the examination, he was keen to work and performances were constant. The stallion was praised by riders and drivers as a pleasant, hardworking horse.

### Training report:

**Walk:** Nisse's walk shows satisfactory scope and rhythm. The foreleg should be placed a bit more forward.

**Trot:** He presents satisfactory posture in trot but must learn to move in a slightly more uphill outline. The stallion displays lots of use of the body and suppleness. The foreleg has good forward reach, the hind leg shows ample flexion and is placed well forward under the body.

**Canter:** The stallion has a roomy canter, but he needs to develop a bit more alacrity and a more uphill frame.

### Riding horse aptitude:

Nisse 544 has satisfactory aptitude as a riding horse. He has three good basic gaits with lots of suppleness and use of the body. He is eager to work and is reliable.

### Driving horse aptitude:

Nisse 544 has a lot of aptitude for driving horse. The walk needs to become a little more established, especially in the foreleg. The trot is roomy with good self-carriage and use of the body, but the stallion must develop a more uphill outline. As a showdriving horse he has satisfactory front with lots of action in the foreleg, but he should move with slightly more bend in the hind leg.

### Test results riding test:

Walk.....	7.5
Trot.....	7.5
Canter.....	7.0

### Behaalde punten tuigproef:

Use foreleg.....	8.0
Use hind leg.....	7.0
Suspension.....	7.5
Posture.....	7.0
Front.....	7.0
Suppleness.....	7.5
Impulsion.....	8.0
Total.....	82.0

### Conclusions Central Examination:

Nisse 544 has successfully completed the Central Examination. He is a pleasant, hardworking stallion who gives his rider and driver a fine feeling. He possesses three good gaits but must learn to move in a more uphill frame. The stallion demonstrates good use of the body and suppleness as well as a good mentality.

### Dam report

Els F.T. Crown Sport Preferent Performance AAA is now a 23-year-old mare and is enjoying her well-deserved retirement in her breeder's yard. The mare has proven herself in breeding by bringing seventeen offspring into the world, with eleven being Star or higher. This makes her double Preferent and just one offspring short for triple Preferent, so a Crown Jewel. The rest of the dam line too sports predominantly Preferent blood, for at least eight generations back.

Els is a fit 23-year-old mare, greying a little in the face but she is in good condition. The mare is still very fertile and is used for embryo transfer, which is proof of her durability. The mare is still active and mentally sharp. Her offspring in the yard all showed a lot of breed expression. Els F.T. is a mare who has proven herself in all facets. Her offspring have also proven themselves in the sport with four Sport and two Sport Elite predicates. Els F.T. is the 3rd dam of KFPS Studbook stallion Kanne 534.

### Final conclusion

Nisse 544 is a stallion with very good mentality; he is eager to work and has good basic gaits. He scores well in all three disciplines, which makes him an all-round sport horse. He comes from a reliable and predicate-rich dam line with many Sport offspring.

### Advice for use

Nisse 544 is expected to improve mentality, zest for work and use of the body. He stems from a predicate-rich dam line with sport embedded in it and with his low kinship he can boost variation in bloodlines. The stallion is best used on mares with a slightly tight top line.

# Pelle 545

## Stallion Information

november 2024

Watch the video:

SANDRA NIEUWENDIJK

**Studbook name:** Paco van 't Lansink **Life number:** 202100205 **Breeder:** M.H. Loman  
**Date of birth:** 1 March 2021 **Height at withers:** 1.67 metres **Lineage:** Matthys 504 x Star Sport Pref\*8 Perf Maiko 373 x Star Oege 267 x Star Naen 264 x FB Mark 232 x Model Gerke 220  
**Pedigree:** 008 **Kinship:** 18.1 % (average 17.8%)

### Exterior:

**Breeding type:** Pelle 545 is a cool-looking stallion with great breed expression. He has a noble and very expressive head and vertical conformation of the neck, with a little bit of an under-neck. The stallion would benefit from a slightly lighter head-neck connection, but poll length is satisfactory. Pelle 545 presents an elegant outline with satisfactory feathers.

**Conformation:** Pelle 545 is a longlined stallion with horizontal build and good length in the foreleg. Shoulder conformation is long but somewhat steep and in his topline the connections could be a little stronger. Croup conformation is correct in terms of shape and length.

**Legwork:** The legwork is a bit coarse but of good and dry quality. The hind leg is a little sickle-hocked and the foreleg is a bit back-in-the-knee. Pasterns are long and the stallion has

### Estimated breeding value exterior:

generously developed feet. Locomotion of the left foreleg is a little toeing-in.

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status
<b>Hydrocephaly:</b>	non-carrier status
<b>Chestnut factor:</b>	non-carrier status
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	no remarks / good

### Observations stable manager, riders and drivers:

Pelle 545 is a people-minded, slightly dominant stallion. He is friendly but quite focused on other horses and therefore easily distracted. This is accompanied with some stallion behaviour too, but has improved throughout the examination. When he is focused he is great to ride and combines it with a good mentality.

### Central Examination:

Pelle 545 has completed the examination as a 3-year-old. Throughout the test the stallion has gained in strength and also in suppleness and use of the body, which is expressed in more ease and trainability in his performances. Sometimes the stallion is still easily distracted, which mainly affects the quality of his walk.

### Training report:

**Walk:** In walk Pelle 545 moves with rhythm and satisfactory length of stride. He can be easily distracted which causes the strides to lose some of its tread.

**Trot:** The trot shows self-carriage with lots of rhythm and good use of the hind leg, great technique and capacity for transitions.

**Canter:** The stallion moves in a high-quality canter with his balance catching the eye. Pelle 545 shows good transitions in canter without the need for speed.

### Riding horse aptitude:

Pelle 545 is an all-round utility horse with a very good uphill canter showing lots of balance. He has satisfactory forward go but is fairly easily distracted. The stallion must learn to relax more in the walk and loosen in the topline. Pelle 545 shows to have a natural talent for technique and balance in trot and canter.

### Driving horse aptitude:

Pelle 545 visibly enjoys the driven work and moves with an uphill posture. He makes a good front and has a carrying and active hind leg. Thanks to his good use of the body the stallion is easy to train, has lots of forward go and promptly reacts to the driver's aids. The walk always remains a bit tense and with little use of the body. Thanks to his good forward reach of the foreleg, lots of front and lots of technique in the hind leg, this stallion exhibits great aptitude for showdriving.

### Conclusions Central Examination:

Pelle 545 has successfully completed the CE in all three disciplines. During his training sessions the stallion demonstrates great zest for work with a lot of forward go and throughout the test he has shown progress in the canter. The trot shows very good posture, use of the body and technique, especially in the driven parts of the CE. The walk still needs attention.

### Dam report

Lobke van 't Lansink Star Sport Preferent Performance AAA died last spring of old age, at the age of twenty-one. The mare has given sixteen offspring with eight of them being declared Star or higher, which makes her double Preferent and therefore Crown Jewel. Lobke's first daughter is Model mare Wyp van 't Lansink Model Sport Preferent Performance AAA (Beart 411). She has obtained her Sport predicate in dressage and scored 83 points in her IBOP under saddle.

Because of the death of dam Lobke her daughter Wyp van 't Lansink Model Sport Pref Perf AAA (Beart 411) was inspected. This mare has satisfactory breed expression and a strong topline. Dry quality of her legwork is satisfactory for a 17-year-old horse. Wyp shows a good walk moving well through the body and demonstrates satisfactory self-carriage as well as satisfactory length of stride in trot. Pelle 545's half-sister Amarin van het Lansink was also inspected. She is a 16-year-old Star mare by Haitse 425. Amarin is a well-built, big-framed mare and considering her age still has pretty clean and dry legwork. Her walk and trot are satisfactory.

### Final conclusion

Pelle 545 is an all-round stallion with three correct basic gaits. A stallion who displays lots of balance and suppleness in trot and especially in canter. The work comes easy to Pelle 545, both in under-saddle as well as in driven work.

### Advice for use

Pelle 545 stems from a dam line with a good breeding record and his dam has great breed expression and stature. Therefore the stallion is expected to improve breed expression as well as balance and technique of the hind leg in canter. The advice is to use Pelle 545 for mares with a roomy walk.

# Rutger 546

## Stallion Information

november 2024

Watch the video:

SANDRA NIEUWENDIJK

**Studbook name:** Rienk fan de Kadyk **Life number:** 202101027 **Breeder:** H. de Boer  
**Date of birth:** 9 April 2021 **Height at withers:** 1.66 metres **Lineage:** Auwert 514 x Crown Sport Pref\*5 A Maurits 437 x Stb Sport Pref\*5 A Erik 351 x Star Pref\*5 Pref Hearke 257 x Star Cobus 248 **Pedigree:** 201 **Kinship:** 17.6 % (average 17.8%)

### Exterior:

**Breeding type:** Rutger 546 is a stallion with a lot of breed expression and a small, noble head. His vertical neck has satisfactory length and a somewhat heavy head-neck connection.

**Conformation:** Rutger 546 is a youngish stallion with good proportions, but he is not overly longlined. The stallion has a well-connected topline and a slightly sloping croup.

**Legwork:** The stallion possesses fine, dry and clean legwork and is a little sickle-hocked in the hind leg. His locomotion in the foreleg is straight. Hard curb under the hock is a little coarse.

### Estimated breeding value exterior:

Reliability.....	36 - 46%
Breeding type.....	108
Conformation.....	109
Legwork.....	114
Walk.....	105
Trot.....	105
Canter.....	102

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status
<b>Hydrocephaly:</b>	non-carrier status
<b>Chestnut factor:</b>	non-carrier status
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	no remarks / good

### Observations stable manager, riders and drivers:

Rutger 546 is a stallion with friendly and calm contact manners. He is inquisitive, people-minded and affectionate. In spite of his willingness, he still feels a little green in the work and contact on the bit is somewhat variable; He clearly improved as the test progressed.

### Central Examination:

Rutger 546 has completed the performance test at the age of three. The stallion has gained in strength in the course of the test which shows in the uphill curve of his performances. His contact on the bit remains a point of attention because the stallion does not always move in a steady, constant contact. Rutger 546 clearly has aptitude for driven work.

### Training report:

**Walk:** The stallion has a roomy and regular walk. Rutger 546 walks with good use of the body.

**Trot:** Rutger 546 steps far forward under the body with good bend in the hock. He sometimes still lacks a bit of strength and sometimes slightly lacks regularity in the transitions between and within the paces. During the test, locomotion technique in the foreleg sometimes varies, which shows more clearly under saddle than in driven work.

**Canter:** In canter he moves with spacious strides and uphill quality is satisfactory. Rutger 546 needs to develop a little more use of the body.

### Riding horse aptitude

Rutger 546 walks with good use of the body and looseness. His movement in walk is always regular, when stretching his neck as well as in the exercises and transitions. In trot the stallion needs to develop more of an uphill outline and more power from the hind leg. He frequently taps his own irons. He demonstrates a roomy trot with flexion in the hind leg, but should step more forward with the foreleg. In canter the stallion still struggles a little with his balance, especially in the right lead, but he shows good-quality strides. Rutger 546 is forward-going with a lot of go, but remains a bit variable in his contact on the bit although he responds well to corrections to that effect.

### Driving horse aptitude

Rutger 546 is clearly more talented for the driven disciplines. Like under saddle, his walk is always regular and roomy with good use of the body. In trot the stallion already shows more rise in the front and then the foreleg moves more freely from the shoulder. He moves with a lot of flexion and technique in the hind leg but needs a slightly high pace in the driven parts. Contact on the bit is variable, he sometimes curls behind the bit when the exercise gets more difficult, but he stays responsive to the aids.

### Character/personality:

	a	b	c	d	e

Use hind leg.....	8.0
Suspension.....	7.5
Posture.....	7.0
Front.....	7.0
Suppleness.....	7.5
Impulsion.....	7.5
Total.....	83.0

### Conclusions Central Examination:

Rutger 546 has successfully completed his CE and clearly shows to have more aptitude for the driven disciplines. The stallion has a strong and roomy walk. Rutger 546 has improved during his time in Exloo and has shown progress in the performances.

### Dam report

Dana fan de Kadyk Crown Sport Preferent A is a 15-year-old mare from pedigree 201. The mare has given seven offspring with the first five having obtained the Star predicate or higher. Dana has acquired the Sport predicate in driven sports. The generations before Dana also sport Preferent blood, in total three in a row.

Dana is a mare with a noble head, she has a long neck and is a little sunken in the mid-section. She has a long croup with the right conformation and for her age she has hard and dry legwork. The mare has a good, roomy walk, the trot also has scope and shows self-carriage with good use of the hind leg.

### Final conclusion

Rutger 546 is a youngish stallion with great breed expression. He possesses a very good and regular walk and a quick hind leg that is placed well forward under the body. The stallion has shown progress during the test and has developed more power and balance.

### Advice for use

Rutger 546 is a stallion who is expected to improve the walk both in terms of rhythm and use of the body. The stallion can also add breeding type and a quick hind leg. Because of his proportionate and somewhat square build the advice is to use Rutger 546 for lengthy and long-lined mares.

# Siebren 547

## Stallion Information

november 2024

SANDRA NIEUWENDIJK

Watch the video:

**Studbook name:** Sieberen J Z **Life number:** 202102645 **Breeder:** J.H. Zwart **Date of birth:** 6 June 2021 **Height at withers:** 1.67 metres **Lineage:** Jurre 495 x Star Alke 468 x Model Sport AA Doaitsen 420 x Star Pref\*6 Pref AA Feitse 293 x Stb Dirk 298 x Model Pref\*9 Pref Wessel 237 **Pedigree:** 50 **Kinship:** 17.4 % (average 17.8%)

### Exterior:

**Breeding type:** Siebren 547 is a stallion with great breed expression. He has a noble head with a friendly expression. Vertical stance of the neck is satisfactory, the neck is long with a light head-neck connection.

**Conformation:** Siebren 547 is a longlined stallion with horizontal build and good length in the foreleg. He has a long, slightly steep shoulder, a closed and correct topline with wide and well-connected loins. Croup conformation is correct in terms of shape and length.

**Legwork:** The legwork is a bit coarse but overall quality and dryness is satisfactory. He has lightly capped hocks in both hind legs. Siebren 547 has correct stance of the hind leg, but is a little narrow in the foreleg and somewhat standing under. The stallion's feet are generously developed. Locomotion of the foreleg is a little toeing-in.

### Estimated breeding value exterior:

Reliability .....	36 - 46%
Breeding type .....	104
Conformation .....	107
Legwork .....	104
Walk .....	104
Trot .....	108
Canter .....	100

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status
<b>Hydrocephaly:</b>	non-carrier status
<b>Chestnut factor:</b>	non-carrier status
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	no remarks / good

### Observations stable manager, riders and drivers:

Siebren 547 has a fine character with an uncomplicated personality; he is friendly,

inquisitive, very constant in the work and still easy to train in moments when stallion behaviour comes to the surface.

### Central Examination:

Siebren 547 has completed the examination as a 3-year-old. The stallion has shown lots of progress throughout the test, both under saddle and in driven work.

### Training report:

**Walk:** Siebren 547 is regular in the walk but strides are a bit short with little stepping over. In the walk he remains tight in the topline, which stops the hind leg from following sufficiently through. The foreleg too should develop more forward reach. The stallion presents an active, diligent walk with satisfactory bend in the hind leg. When the stallion relaxes in the topline during stretching forward and down, the scope in walk improves considerably. Both riders and drivers point out that the walk feels short and a bit tense, but remains regular.

**Trot:** The trot shows self-carriage, with lots of ground-coverage and use of the body. Siebren 547 has a beautiful forehand, makes a fine posture, rises in the withers and is light-footed. The stallion can effortlessly extend his strides in trot while keeping up the rhythm and regularity. His capacity for transitions is good, he keeps engaging the hind legs and the foreleg reaches far forward.

**Canter:** The canter has strongly improved in the course of the test. Siebren 547 canters well from the hind leg with uphill strides. He has good balance in canter, responds well to training in this pace and shows capacity for transitions.

### Riding horse aptitude:

Siebren 547 has natural balance and suppleness in trot and canter and is always enjoying the work. The stallion performs transitions with ease and active use of the hind leg. He is an all-round utility horse with a very good uphill canter and great balance. Siebren 547 is very responsive to the aids and is an intelligent horse. He demonstrates satisfactory forward-go. The stallion must learn to relax more in the walk and loosen in the topline.

### In-harness aptitude:

Siebren 547 is an all-round horse and certainly shows to be talented for showdriving too. The stallion moves in an uphill outline, makes front and has good zest for work. In trot he moves with good flexion in the hind leg, shows a long moment of suspension, suppleness and capacity for transitions. The walk is short but active. The stallion shows good trainability and willingness in the work.

### Test results riding test:

Walk .....	7.0
Trot .....	8.0
Canter .....	8.0
Balance & posture .....	8.0
Suppleness .....	7.0

\* during tacking/hitching up, taking temperature etc. \*\* mental \*\*\* physical

### Test results showdriving test:

Use foreleg .....	8.0
Use hind leg .....	7.0
Suspension .....	7.5
Posture .....	8.0
Front .....	8.0
Suppleness .....	8.0
Impulsion .....	8.0
Total .....	85.5

### Conclusions Central Examination:

Siebren 547 has successfully completed the CE in all three disciplines. During his training sessions the stallion demonstrates great zest for work with a lot of go and throughout the test he has shown progress in the canter. The trot shows good posture, use of the body and technique. The walk still needs attention.

### Dam report

Bente P.W. Star is an 8-year-old Star mare from pedigree 50 who has given four offspring. So far Siebren 547 is her only Star offspring. Bente P.W. is out of the Doaitsen 420 daughter Annette fan 'e Hamsterheide Model Sport AA, who along with the Model predicate has also obtained the Sport predicate in dressage. Annette advanced to Z2 dressage and after that also earned her spurs in Limit Classes showdriving. Bente P.W. is in good condition and is still frequently used for driven work. The mare has a friendly expression and calm personality.

Bente is a mare with a little bit of a downhill build, good breed expression and a long mane. She has a long, well-connected neck, a correct topline and a croup with satisfactory length that is slightly sloping down. Her legwork shows satisfactory quality and large feet.

The walk is active and rhythmic, but should show more ground-coverage. In trot the mare moves with powerful use of the hind leg, which is placed well forward under the body. She displays a satisfactory moment of suspension, although the rhythm is a bit rushed.

### Final conclusion

Siebren 547 is an all-round stallion with three correct basic gaits. A stallion who displays lots of balance and suppleness in trot and canter. Siebren 547 demonstrates to enjoy his work under saddle as well as in the harness.

### Advice for use

Siebren 547 should be used for mares with a good walk. He is expected to add balance and flexion to the hind leg as well as improve mentality and trainability.

# Gurbe 548

## Stallion Information

november 2024

LORI ANN THIVING

**Studbook name:** Hilbrân fan North Star **Life number:** 201802960 **Breeder:** Lana & Megan Markey **Date of birth:** 29 May 2018 **Height at withers:** 1.70 metres **Lineage:** Wybren 464 x Model AA Sipke 450 x Star Pref\*4 Teunis 332 x Star Piter 312 x Star Pref\*7 Feitse 293 x Model Pref\*7 Oege 267 **Pedigree:** 002

### Exterior:

**Breeding type:** Gurbe 548's head shows satisfactory noble expression and he has a long neck of correct build. He has abundant feathers.

**Conformation:** Gurbe 548 is a longlined stallion with a proportionally strong build. He has a long neck with good length in the poll. Back and loin section show satisfactory strength and croup conformation is correct in terms of shape and length.

**Legwork:** Gurbe 548 is a high-legged stallion with a long, slightly toeing-in foreleg. Stance of the hind legs is correct. The stallion has clean and dry legwork.

### Estimated breeding value exterior:

Reliability .....	36 - 46%
Breeding type .....	100
Conformation .....	103
Legwork .....	104
Walk .....	100
Trot .....	104
Canter .....	104

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status based on lineage
<b>Hydrocephaly:</b>	non-carrier status based on lineage
<b>Chestnut factor:</b>	no observations
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	acceptable

### Observations stable manager, riders and drivers:

Gurbe 548 is a calm and relaxed stallion when handled, he has no stable vices and is a good eater with a healthy appetite. In training Gurbe 548 shows great zest for work, is very forward-going and needs little encouragement. The stallion gives his rider a good feeling and is very cooperative. He readily responds to aids and easily adjusts to surrounding.

### Central Examination:

Gurbe 548 has completed the examination as a 6-year-old. Gurbe 548 is a stallion with very good work ethics. He responded well to training in both disciplines and was easy to train. In driven work he demonstrated to be strong and easy to train.

### Training report:

**Walk:** Gurbe 548 has a roomy and rhythmic walk but needs to develop a bit more use of the body.

**Trot:** In under-saddle work Gurbe 548 must learn to move with more self-carriage and a longer moment of suspension. Suppleness in trot needs to improve. In driven work he moves in an uphill outline with good length of stride and finds it easier to carry himself. Here too the stallion needs to develop a little more use of the body.

**Canter:** Gurbe 548 has an uphill canter with satisfactory length of stride and satisfactory balance.

### Riding horse aptitude:

Gurbe 548 is keen to work and eager to please his rider. With his good walk and canter he shows good aptitude for riding horse.

### Driving horse aptitude:

Gurbe 548 displays a good mentality and responds very well to training in driven work. The stallion moves in an uphill posture and has a roomy walk. He maintains the uphill frame in trot but must learn to make a bit more front. He gives the driver a good feeling. In showdriving he demonstrates lots of scope and posture but must develop more front as well as more suppleness and moment of suspension.

### Test results riding test:

Walk .....	7.5
Trot .....	6.5
Canter .....	6.5
Balance & posture .....	7.0
Suppleness .....	6.0

### Test results showdriving test:

Use foreleg .....	7.5
Use hind leg .....	7.0
Suspension .....	7.0
Posture .....	7.0
Front .....	6.5
Suppleness .....	6.5
Impulsion .....	7.5
Total .....	78.0

### Conclusions Central Examination:

Gurbe 548 has successfully completed the Central Examination in all three disciplines. He is a stallion with good size and a very pleasing character, good willingness to work and a lot of go. Suppleness remains a point of attention.

### Dam report

Lyren fan North Star is a 14-year-old Model AA mare by Sipke 450, from pedigree 50. The mare has given two offspring who were both declared Star. At the age of eight Lyren received the Model predicate and was awarded 78.5 points for her ABFP Test under saddle. Gurbe 548's granddam is the durable 22-year-old Iris van Moerkerken Star Preferent, by Teunis 332. Iris brought eight offspring into the world, four of which have been declared Star or higher and two have achieved the AA predicate. The mare line goes back on a series of five Model Preferent and fertile mares with Eeldertsje Model Pref (Nammele 147) as their foundation dam.

### Final conclusion

Gurbe 548 is a strong and friendly stallion who clearly enjoys the work and presents a good walk and canter. In driven work and especially in the driving test, Gurbe 548 has shown considerable progress in the course of the Central Examination.

### Advice for use

Gurbe 548 comes from a dam line with a good reputation in breeding and lots of Preferent blood. He is expected to improve size, character and the walk. The advice is to use him on mares with good use of the body and suppleness in trot.

# Sepke 549

## Stallion Information

november 2024

LORI ANN THIVING

**Studbook name:** Sepke van de Meerbos **Life number:** 202100708 **Breeder:** M. Driessen  
**Date of birth:** 27-03-2021 **Height at withers:** 1.59 metres **Lineage:** Tiede 501 x Star Bikkel 470 x Star Tsjalle 454 x Star Sape 381 x Star A Tsjerk 328 x Star Pref\*3 Perf Ygram 240  
**Pedigree:** 050

### Exterior:

**Breeding type:** Sepke 549 is a youthful, strapping stallion with lots of breeding type. He has a noblehead with a long, vertical neck, abundant feathers and a graceful outline.

**Conformation:** Sepke 549 has a proportionate build and satisfactory longlined quality of build. He is a stallion with front, a long and sloping shoulder and the topline shows satisfactory strength with a long croup of good conformation.

**Legwork:** Seen from the front and side, stance of the foreleg is straight with correct movement sequence. The stallion's hind legs have satisfactory dry and clean quality but he is a little straight in the hind leg.

### Estimated breeding value exterior:

Reliability.....	36 - 46%
Breeding type.....	111
Conformation.....	114
Legwork.....	111
Walk.....	104
Trot.....	107
Canter.....	103

### DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

<b>Dwarfism:</b>	non-carrier status based on lineage
<b>Hydrocephaly:</b>	non-carrier status based on lineage
<b>Chestnut factor:</b>	non-carrier status based on lineage
<b>Veterinary:</b>	no observations
<b>Roaring:</b>	acceptable

### Observations stable manager, riders and drivers:

Sepke 549 is well-mannered and calm, he has no stable vices and has a relaxed attitude. Sepke performs very consistently in training, he responds eagerly to work, has a pleasant character and clearly tries to please his rider or driver.

### Central Examination:

Sepke 549 completed the Central Examination at the age of three. He needed time to develop more strength but has consistently shown progress throughout the test. He is a stallion with lots of suppleness and go. Sepke 549 responded very well to training and proves to have good learning capacity and a fine character.

### Training report:

**Walk:** Sepke 549 has a roomy walk with good use of the body.

**Trot:** Under saddle Sepke 549 must learn to trot with more self-carriage, but he moves with good suppleness. In driven work he moves in an uphill frame with good bend in the hind leg, placing the foreleg forward with ample reach and displaying a good moment of suspension.

**Canter:** The canter shows satisfactory uphill quality and length of stride, but in this pace Sepke 549 still needs to gain more strength.

### Riding horse aptitude:

Sepke 549 is a young stallion who can become a good riding horse once he gains more strength. His mentality and zest for work stand out. He has a good walk and lots of suppleness.

### Driving horse aptitude:

In driven work Sepke 549 flaunts a luxurious front, making himself taller and trotting with great suppleness and bend in the hind leg. When the stallion is relaxed he moves in a spacious walk and with good use of the body. Sepke 549 demonstrates to have aptitude for driven- as well as showdriving work.

### Conclusions Central Examination:

Sepke 549 has successfully completed the Central Examination in all three disciplines. He is a stallion displaying great go and zest for work in all three disciplines, with an eye-catchingly good walk under saddle. In driven work he is a very pleasing horse who responds exceedingly well to training. Sepke 549 is a stallion with great athletic capacity.

### Dam report

Anke fan Meren-State is an 8-year-old Star mare by Bikkel 470 and she comes from pedigree 50. This mare has produced four offspring, one has received the Star predicate. Sepke 549's granddam is Lisa K. Star by Tsjalle 545, but she died at the age of nine. Lisa has given four offspring, three of which have become Star. The mare line harks back to the fertile and Preferent Doet Star (Lammert 260).

### Final conclusion

Sepke 549 is a youngish stallion with the potential to develop more strength under saddle and has a good walk that stands out. Both under saddle and in the harness his movement shows very good suppleness. His friendly and hardworking personality catch the eye.

### Advice for use

Sepke 549 is a good match for big-framed mares. He is expected to improve character, zest for work and suppleness. He can also add walk and breeding type.

# Mees 497

**Date of birth:** 10 April 2012  
**Breeder:** M. van Vliet, Koudekerk a/d Rijn  
**Owner:** Aftonmora Friesians, Jonstrorp Sweden  
**Lineage:** Tymon 456 x Star Perf Dries 421 x Star Pref\*5 Oltman 317 x Star Jakob 302  
**Pedigree:** 11  
**Kinship:** 17.5%  
**Observations:** Veterinary observation, hock Right Hind: OC, grade C

## General

Mees 497 was approved as a 4-year-old in the autumn of 2016 on the basis of his more than satisfactory lineage, more than satisfactory exterior with a lot of breed expression and good performances in all three disciplines. From his first stud season 48 foals were registered in 2018 with 81% born out of (at minimum) Star mares. Mees 497 completed his Progeny Test in 2023 on the basis of three year collections of 3-, 4- and 5-year-old offspring, following that Mees 497 was put on hold due to insufficient numbers of inspected offspring to this date and a hereditary profile that proved unsatisfactory.

## Exterior

The Mees 497 offspring are a uniform group of horses that should have more correct conformation and legwork. Especially in the topline they lack connection. They have satisfactory breed expression but would benefit from more lavish feathers. Across the board height at withers is satisfactory. Body shape is downhill. Shoulder conformation is sloping. Shape of the back is rather weak and the loin section should be stronger. Croup is average in terms of conformation and length. The offspring have average quality of legwork. Seen from the side, stance of the foreleg is straight. Stance of the hind leg is noticeably too sickle-hocked. Stance of the foreleg is toeing-in. The pasterns are long and size of the feet is adequate. For a more detailed description of the exterior please consult the breeding values for exterior.

## Character/training report

In the yard the Mees 497 offspring are calm, pleasant, inquisitive horses who are relaxed but can also be a bit cheeky and dominant when handled. Reliability in the work is satisfactory, the horses are sensitive, a little too easily distracted and should volunteer more zest for work. They have satisfactory perseverance and stamina.

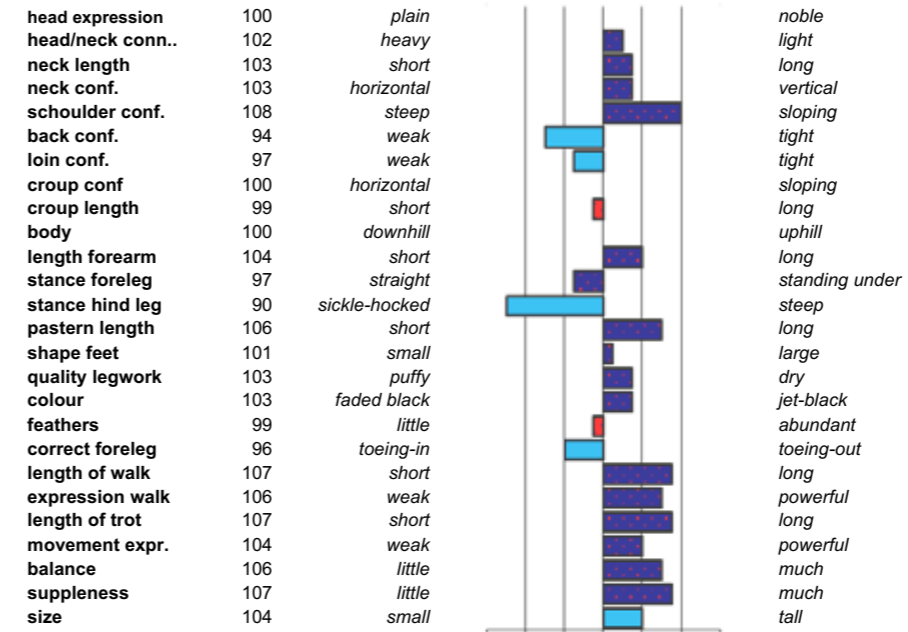

## Movement/performance

From the Mees 497 offspring 20 individuals have taken part in ABFP Tests. The age of the tested horses ranged from three to five years old. Both under saddle as well as in driven work the offspring clearly display below-average performances. Two offspring achieved an AAA score. Across the board the walk is rather short and would benefit from more expression. A number of horses struggled with the rhythm in walk. The trot is average in terms of scope and strength. The canter shows satisfactory scope and power but they should move with more use of the body and rise in front. Generally speaking, the offspring need to display more suppleness and capacity for transitions. Impulsion and rideability of the tested horses are clearly below average.

## Conclusion

Mees 497 presents a below-average hereditary profile for exterior (breeding value total 98; Star% mares 33; Star% stallions 27%) and a clearly below-average result for the performance test. The percentage of not-accepted mares is high. The offspring have weak topline and deviation in stance of legwork. The offspring have calm and reliable stable manners but contact manners tend to be somewhat cheeky and dominant. They show little zest for work and suppleness in ridden- as well as in driven work. Mees 497 will be sustained for breeding for the benefit of outcrossing.

# Waander 512

**Date of birth:** 28 May 2015  
**Breeder:** M. De Jong, Tjalleberd  
**Owner:** Stoeterij Friese Visser, Drachten  
**Lineage:** Loadwyk 431 x Star Beart 411 x Star\*1 Oepke 266 x Star Preferent\*5 Naen 264  
**Pedigree:** 38  
**Kinship:** 17.7%  
**Observations:** osteochondrosis C5 (flattening) on hock right hind leg

## General

Waander 512 Stb AAA was approved in the autumn of 2019 as a 3-year-old stallion on the basis of his good exterior and good performances. From his first stud season 46 foals were registered in 2021 with 74% born out of (at minimum) Star mares. Waander 512 Stb AAA completed his Progeny Test in 2024 based on one year collection of 3-year-old offspring.

## Exterior

The Waander 512 offspring are a uniform group and because of their markedly noble head, light head-neck connection and average neck length and neck conformation show good breeding type. They are not overly rich in terms of feathers. The offspring have good length in the foreleg and satisfactory uphill conformation. They have satisfactory slope in the shoulders. Back and loin section should be stronger. The croup has average length and conformation. The legwork should radiate more quality. In many cases the foreleg is standing-under and the hind leg is noticeably sickle-hocked. Seen from the front, stance of the foreleg is correct. The offspring have good length in the pastern and the feet are average in size. For a more detailed description of the exterior please consult the breeding values for exterior.

## Character/Training report

The Waander 512 offspring have pleasant, calm, inquisitive, slightly dominant and cheeky stable manners. When handled they are relaxed. In the work they score below average on reliability, trainability and attitude to work, they are sensitive and easily tense up. They give satisfactory reaction to the aids and have satisfactory zest for work.

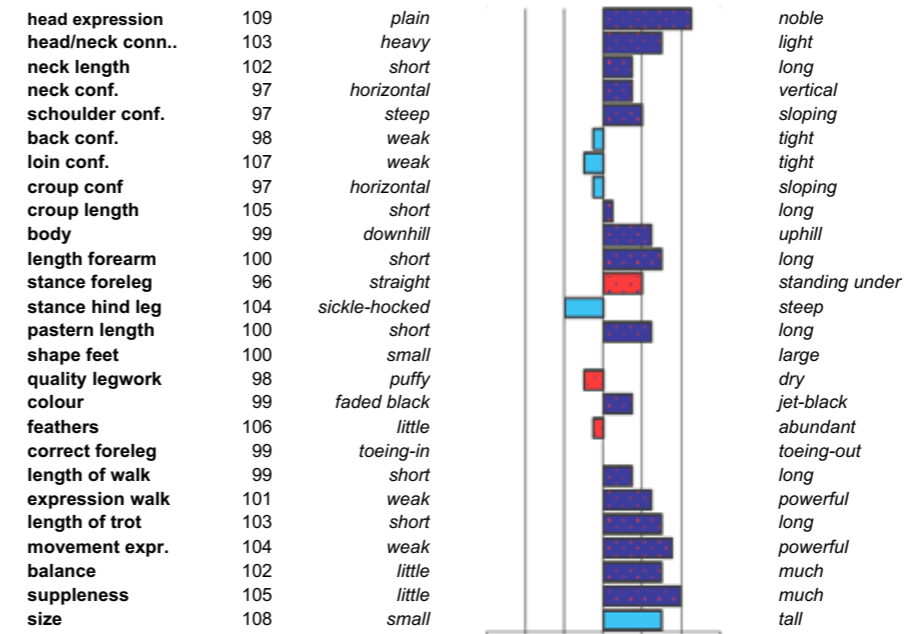

## Movement/Performance

Nineteen Waander 512 offspring have participated in ABFP Testing and one stallion (Reitse van de Pôle) has completed the saddle exam of the 2024 Central Examination with 69.5 points. The Waander 512 offspring are especially in their element in driven work, where they show a more than above-average total score of 76.6. The riding tests show average results in terms of total score. Six horses have achieved an AAA score. The trot is roomy with good use of the foreleg, strong impulsion and especially in the driven parts good self-carriage, moment of suspension as well as suppleness, combined with good use of the body. In canter the horses move with roomy and active strides, but they need to develop more use of the body and a distinctly more uphill frame. The walk should show more use of the body and particularly in the driven part should show more strength and length of stride. Capacity for transitions is better in the driving test than in the saddle test. The in-hand walk of the Waander 512 offspring demonstrates satisfactory length of stride and activity. The trot is roomy and powerful with a lot of balance and suppleness.

## Conclusion

Waander 512 has a satisfactory hereditary profile for exterior (breeding values breeding type 110, conformation 106, legwork 102; total 107; Star% mares 35%; Star% stallions 44%). In the yard the offspring prove to have a good character, but they can also be a little cheeky. In the work they tend to have more reliability and trainability. In their performances they show a clearly above-average total score in the harness test, with the quality in trot especially catching the eye. Based on the satisfactory overall hereditary profile Waander 512 will be permanently approved on offspring.

# Auwert 514

**Date of birth:** 15 March 2016  
**Breeder:** A. Kranendonk, Lochem  
**Owner:** De Nieuwe Heuvel, Lunteren  
**Lineage:** Jehannes 484 x Model AA\*2 Andries 415 x Star Preferent Performance AAA\*5 Folkert 353 x Star Preferent\*4 Leffert 306  
**Pedigree:** 25  
**Kinship:** 19.1%  
**Observations:** none

## General

Auwert 514 Stb Sport AAA was approved as a 3-year-old stallion in the autumn of 2019 on the basis of his good exterior, good lineage and a good performance showing lots of aptitude for all disciplines. From his first stud season 121 foals were registered in 2021, with 93% born out of (at minimum) Star mares. Auwert 514 completed his Progeny Test in 2024 based on one year collection of 3-year-old offspring.

## Exterior

The Auwert 514 offspring are a uniform batch of very breed-typical and correctly-built horses with good legwork. The offspring flaunt lots of breed expression with their remarkably light head-neck connection, a long vertical neck and more than satisfactory feathers. Body shape is average with good length in the foreleg. The offspring have a good topline with a well-connected loin section. The croup is lightly sloping and would benefit from a bit more length. The horses have ultra dry legwork. Seen from the side stance of the foreleg is straight. Stance of the foreleg is correct. Stance of the hind leg is correct. The pasterns are long. The feet are clearly on the small side. For a more detailed description of the exterior please consult the breeding values for exterior.

## Character/Training report

The Auwert offspring are relaxed and inquisitive horses with very pleasant and calm stable manners. In the work they are reliable, easy to train and they respond well to the aids. They demonstrate zest for work and clearly enjoy the work, showing satisfactory perseverance and stamina.

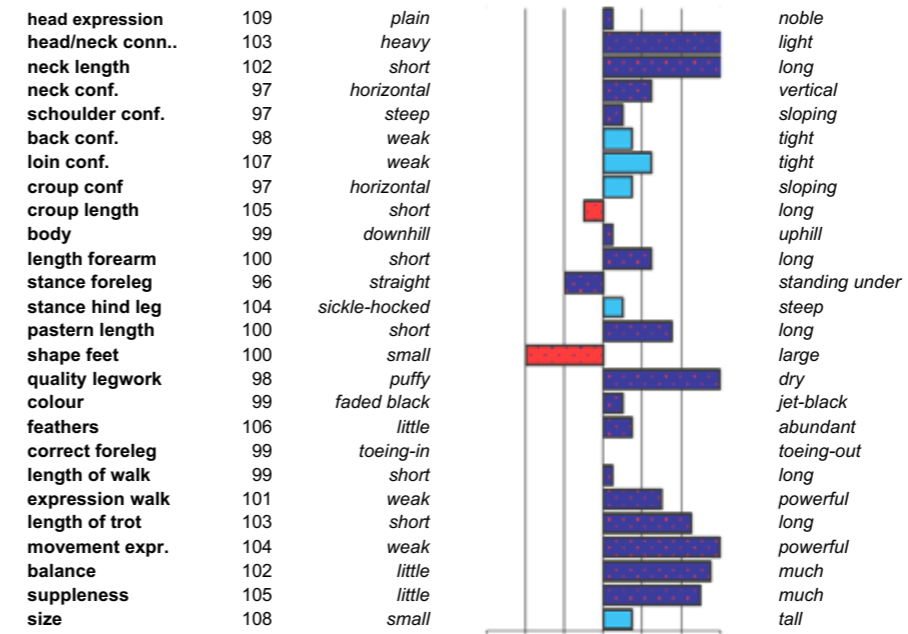

## Movement/Performance

Eighteen Auwert 514 offspring have taken part in ABFP testing and one stallion (Rutger 546) has successfully completed the 2024 Central Examination. Both under saddle as well as in driven work the offspring display very good performances with distinctly above-average total scores. In all parts they score above average, except in the walk. In the riding test they get an average score on the walk, but a fraction below average in the driving test. From his first crop he has one son approved as a Studbook stallion. Rutger 546 collected 77 points (AA) in the saddle test, 82.5 points in the driving test (AAA) and 83 points (AAA) in the showdriving test. Three offspring have obtained an AAA score in their ABFP Test. The Auwert 514 offspring are light-footed, showing good use of the foreleg and lots of impulsion in trot in both driving- and saddle test. They display suppleness and especially in the driving test move in an uphill frame with good self-carriage. The canter has good scope and activity with satisfactory quality of stride, although still a little on the forehand. Length of the walk, and in the driving test also use of the body in walk, remain a point of attention. The offspring show good capacity for transitions, lots of impulsion and good rideability. When presented in-hand the Auwert 514 offspring have satisfactory scope and power in the walk. The trot is roomy and remarkably powerful with distinctly good balance and suppleness.

## Conclusion

Auwert 514 has an excellent hereditary profile for exterior (breeding values breeding type 111, conformation 110, legwork 113; total 114; Star% mares 64%; Star% stallions 47%). The offspring demonstrate to have good characters both in the yard as well as in the work. In their performances they show above-average total scores both in the saddle test and the harness test, with good quality of basic gaits. Length in the walk remains a point of attention. Based on the distinctly positive overall hereditary profile Auwert 514 will be approved on offspring.

Preliminary Report Progeny Test | March 2025

# Ulbe 506

**Date of birth:** 13 May 2014  
**Breeder:** H. & J. Jørgensen  
**Owner:** Extreme Fresians Moscow ID, VS  
**Lineage:** Anders 451 x Star Pref\*6 Anton 343 x Star Pref\*6 Hearke 254 x Star Pref\*4 Cobus 248  
**Pedigree:** 10  
**Kinship:** 16.6%  
**Observations:** Positive carrier status dwarfism

## General

Ulbe 506 Stb Sport Elite AA was approved as a 3-year-old stallion in the autumn of 2018 on the basis of his good exterior, good lineage, his relatively low kinship of 16.5% and a good performance showing lots of aptitude for all three disciplines. From his first stud season 37 foals were registered in 2020, with 59% born out of (at minimum) Star mares. After his first two crops of offspring Ulbe 506 could not yet meet the requirements of the Progeny Test and was put on hold in December 2024. To this date twenty offspring have been tested. The required number of forty inspected offspring has so far not been realised.

## Exterior

The Ulbe 506 offspring are a satisfactorily uniform group of horses that would benefit from slightly more size. The offspring should have more breed expression: on average the heads are noble, the necks need more length and more vertical build. Feathers of the offspring is satisfactory. They display satisfactory horizontal body shape, good topline and good croup conformation. Shoulder conformation is average. Leg quality is average. The feet might be slightly bigger and the pasterns a bit longer. Seen from the side stance of foreleg and hind leg is correct. Stance of foreleg ranges between average and slightly toeing-in. For a more detailed description of the exterior please consult the breeding values for exterior.

## Character/Training report

The Ulbe 506 offspring demonstrate above-average stable manners: they are very pleasant, calm, inquisitive and relaxed horses. In the work reliability is satisfactory with good trainability and they respond well to the aids. Occasionally, they are easily distracted. They demonstrate satisfactory perseverance and stamina.

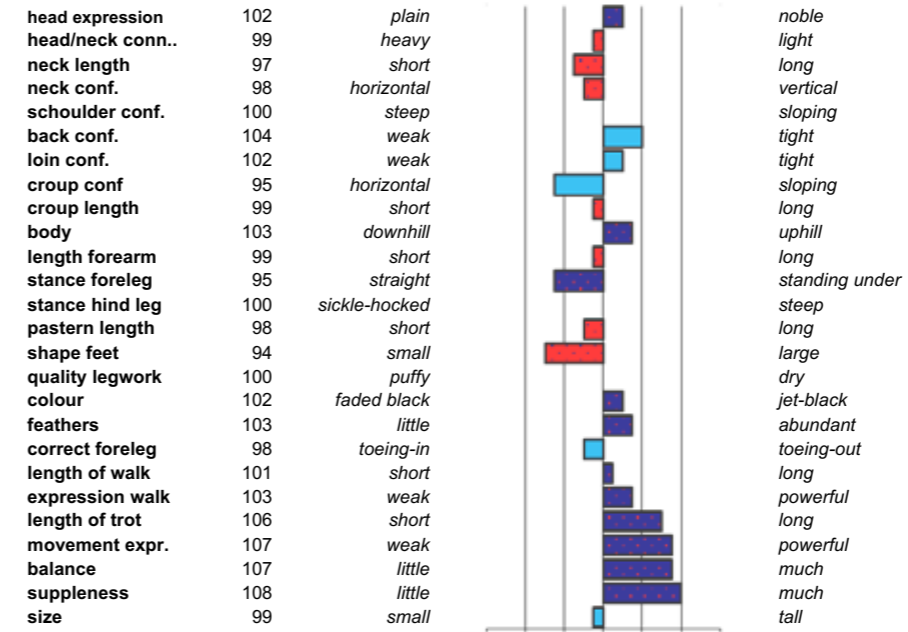

## Movement/Performance

From the Ulbe 506 offspring twenty individuals have taken part in ABFP Tests. The offspring show satisfactory performances under saddle as well as in driven work. Three offspring have achieved an AAA score. They display good impulsion and rideability and more than satisfactory capacity for transitions. The walk presents a variable picture across a wide spectrum. A number of horses lacked rhythm in the walk. In the riding test the walk is generally powerful with good ground-coverage. In driven work the walk is average. In trot the offspring come more into their own stride in the in-harness parts, especially in terms of self-carriage, suppleness and posture. The canter is active with satisfactory quality of stride but still a little bit on the forehand. When presented in-hand the Ulbe 506 offspring on average present a roomy walk showing satisfactory power. The trot is roomy and powerful with a lot of balance and suppleness.

## Conclusion

Ulbe 506 has a satisfactory hereditary profile (breeding value total 102: Star% mares 30; Star% stallions 25%). The offspring demonstrate to have good characters both in the yard as well as in the work. In use they score slightly below-average in the riding test and slightly above-average in the harness test (breeding value total 101). Based on the overall hereditary profile Ulbe 506 receives preliminary approval on offspring.

# Willem 508

**Date of birth:** 5 May 2015  
**Breeder:** W. E. Lokhorst, Ederveen  
**Owner:** Friones El Centenario SPR de RL de CV, Mexico  
**Lineage:** Hette 481 x Star Pref\*4 Folkert 353 x Star\*2 Tsjomme 329 x Model\*3 Oege 267  
**Pedigree:** 61  
**Kinship:** 18.5%  
**Observations:** Positive carrier status dwarfism. Both sides osteochondrosis (OCD) in the fetlock joints, grade D

## General

Willem 508 Stb Sport AAA was approved in 2018 at the age of three on the basis of his more than satisfactory lineage, good exterior, more than satisfactory aptitude for riding- and driving horse and satisfactory aptitude for showdriving. From his first stud season 30 foals were registered in 2021 with 88% born out of (at minimum) Star mares. Willem 508 completed the performance part of his Progeny Test in 2024 on the basis of two year collections of 3- and 4-year-old offspring. To date, Willem 508 has not yet met the requirement of forty inspected offspring.

## Exterior

The Willem 508 offspring are a satisfactorily uniform batch of well-developed horses with correct builds and a good foundation. The offspring should have a stronger breed expression. The horses would especially benefit from more feathers and a deeper black coat colour. Body shape is satisfactorily horizontal with good length in the foreleg. The offspring have satisfactory strength in the back with a well-connected loin section and noticeably good croup conformation. Their croups are long. The horses have dry legwork. Seen from the side stance of the foreleg is remarkably straight. Stance of the foreleg is correct. Stance of the hind leg is correct. Shape of the feet and pastern length are average. For a more detailed description of the exterior please consult the breeding values for exterior.

## Character/Training report

In the yard the Willem 508 offspring are inquisitive, slightly dominant and cheeky but also relaxed when handled. In the work they are a bit sensitive and easily tense up. They should volunteer more zest for work and be more responsive to the aids. They also score below-average on stamina and perseverance, the offspring are rather easily distracted and they could score better on learning capacity.

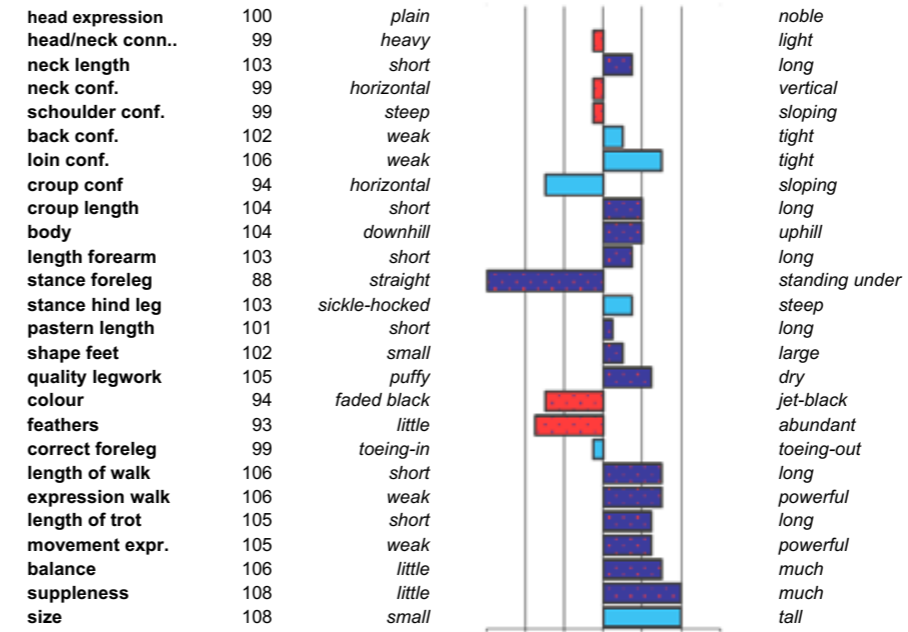

## Movement/Performance

From the Willem 508 offspring 19 individuals have taken part in ABFP Tests. Both in the riding- and driving test the offspring present average performances, but they generally do better in the riding parts. Two offspring have achieved an AAA score. In the riding test a third of the offspring struggled with rhythm in the walk. In trot the hind leg should step further under the body. In the riding test the offspring need to develop more use of the body in both walk and trot as well as more capacity for transitions. The canter shows satisfactory scope, activity and quality of stride. When presented in-hand the Willem 508 offspring display a roomy and powerful walk. The trot is roomy and remarkably powerful with distinctly good balance and suppleness.

## Conclusion

Willem 508 has a good hereditary profile (breeding value exterior total 104; Star% mares 60%; Star% stallions 42%), with their strong loin section and good croup conformation catching the eye. The offspring are somewhat dominant and cheeky when handled and in the work score a bit below-average in terms of character. With the in-hand presentation the offspring demonstrate a good walk and trot. The offspring present satisfactory scores in their performances (breeding value movement / sport aptitude total 108). Based on the satisfactory overall hereditary profile Willem 508 will be preliminary approved on offspring.

# Stallion family-tree KFPS-studbook stallions | November 2024

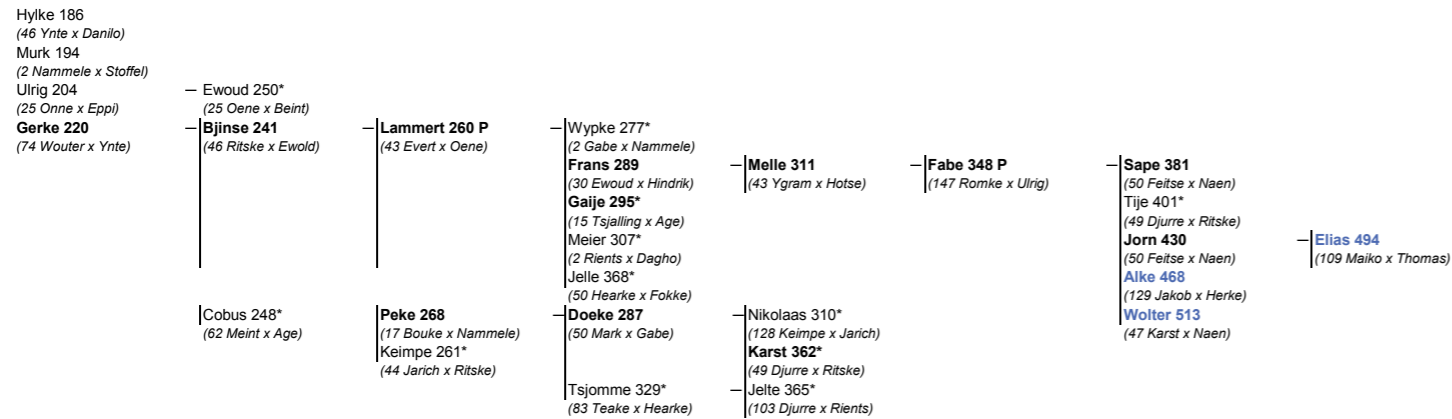

In this overview the KFPS-studbook stallions are displayed in 4 studs lines:

Age, Ritske, Jarich and Mark. The outline only include the stallions that currently have a covering license or in the direct male line of an active Stallion arise or are the maternal grand dam of an active studbook Stallion. In parentheses the Mareline from which a Stallion results is displayed as well as the maternal grand dam and the maternal great grand dam. The current, living and available studbook stallions are indicated in blue.
