

Boet 516

Date of birth: 26 June 2016
Breeder: A.P. van de Ven, Vinkel
Owner: Folmer & T.C. Visser, Lunteren
Lineage: Jouwe 458 x Star*2 Uldrik 457 x Star Preferent* Sytse 385 x Star*3 Fetse 349
Pedigree: 54
Kinship: 18.4%
Observations: Positive carrier status dwarfism
 Stallion Boet 516 was diagnosed with roaring. Research of his offspring has shown no increased occurrence of roaring.

General

Boet 516 Stb Sport AAA was approved as a 3-year-old stallion in the autumn of 2019 on the basis of his very good exterior, satisfactory quality of lineage and very good performances in all three disciplines. From his first stud season 56 foals were registered in 2021, with 80% born out of at minimum Star mares. Boet 516 completed his Progeny Test in 2025 based on two year collections of 3-year-old offspring.

Exterior

The Boet 516 offspring are a batch of satisfactorily uniform and very breed-typical as well as correctly-built horses with satisfactory size. The offspring have noble heads, long necks and head-neck connection is satisfactorily light and they flaunt remarkably abundant feathers. Vertical conformation of the neck is satisfactory. They have satisfactory uphill body shape. They would benefit from a bit more length in the foreleg. Length and connection of the topline is satisfactory. The croups are remarkably long with average conformation. Shoulder conformation is sloping. The offspring would benefit from more quality in the legwork. Size of the feet is satisfactory. Pastern length is average. Stance of the hind leg is slightly sickle-hocked and stance of the foreleg is frequently toeing-out. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Boet 516 offspring have very pleasant and calm stable manners and are inquisitive as well as relaxed horses when being handled. They earn maximum scores for these character traits. Reliability in the work is high. They are not prone to building up tension and are easy to train. They need to develop a bit more zest for work, perseverance and stamina.

Movement/Performance

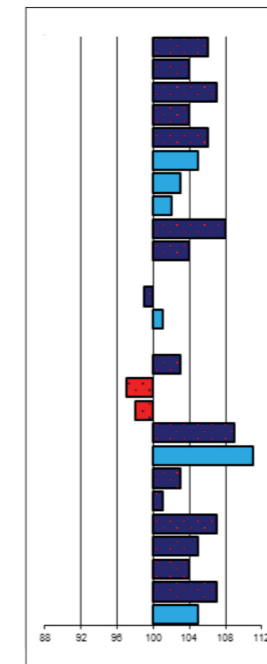

From the Boet 516 offspring 21 individuals have taken part in ABFP Tests at the age of 3. Especially under saddle the offspring show good performances. In driven work they present average performance results. One offspring has acquired an AAA score. The Boet 516 offspring display good rideability. The walk is average in terms of length of stride and power. In driven work rhythm of the walk needs attention. In ridden work the trot is roomy, satisfactorily uphill and with good self-carriage and suppleness. In the harness the offspring need to develop more self-carriage and moment of suspension. The canter is roomy with satisfactory strides. When presented in-hand scope and power of the walk is average. The trot is roomy and powerful with satisfactory balance and suppleness.

Conclusion

Boet 516 has a good hereditary profile for exterior (breeding value total 106; Star% mares 61; Star% stallions 58%) and he is found to strongly improve breed expression and conformation. The legwork is a point of attention. The offspring display excellent character in the yard. In the work the horses are very reliable and respond well to training. In use they perform at their best in ridden work (breeding value total 99). Based on the overall hereditary profile Boet 516 is approved on offspring.
