

Auwert 514

Date of birth: 15 March 2016
Breeder: A. Kranendonk, Lochem
Owner: De Nieuwe Heuvel, Lunteren
Lineage: Jehannes 484 x Model AA*2 Andries 415 x Star Preferent Performance AAA*5 Folkert 353 x Star Preferent*4 Leffert 306
Pedigree: 25
Kinship: 19.1%
Observations: none

General

Auwert 514 Stb Sport AAA was approved as a 3-year-old stallion in the autumn of 2019 on the basis of his good exterior, good lineage and a good performance showing lots of aptitude for all disciplines. From his first stud season 121 foals were registered in 2021, with 93% born out of (at minimum) Star mares. Auwert 514 completed his Progeny Test in 2024 based on one year collection of 3-year-old offspring.

Exterior

The Auwert 514 offspring are a uniform batch of very breed-typical and correctly-built horses with good legwork. The offspring flaunt lots of breed expression with their remarkably light head-neck connection, a long vertical neck and more than satisfactory feathers. Body shape is average with good length in the foreleg. The offspring have a good topline with a well-connected loin section. The croup is lightly sloping and would benefit from a bit more length. The horses have ultra dry legwork. Seen from the side stance of the foreleg is straight. Stance of the foreleg is correct. Stance of the hind leg is correct. The pasterns are long. The feet are clearly on the small side. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Auwert offspring are relaxed and inquisitive horses with very pleasant and calm stable manners. In the work they are reliable, easy to train and they respond well to the aids. They demonstrate zest for work and clearly enjoy the work, showing satisfactory perseverance and stamina.

Movement/Performance

Eighteen Auwert 514 offspring have taken part in ABFP testing and one stallion (Rutger 546) has successfully completed the 2024 Central Examination. Both under saddle as well as in driven work the offspring display very good performances with distinctly above-average total scores. In all parts they score above average, except in the walk. In the riding test they get an average score on the walk, but a fraction below average in the driving test. From his first crop he has one son approved as a Studbook stallion. Rutger 546 collected 77 points (AA) in the saddle test, 82.5 points in the driving test (AAA) and 83 points (AAA) in the showdriving test. Three offspring have obtained an AAA score in their ABFP Test. The Auwert 514 offspring are light-footed, showing good use of the foreleg and lots of impulsion in trot in both driving- and saddle test. They display suppleness and especially in the driving test move in an uphill frame with good self-carriage. The canter has good scope and activity with satisfactory quality of stride, although still a little on the forehand. Length of the walk, and in the driving test also use of the body in walk, remain a point of attention. The offspring show good capacity for transitions, lots of impulsion and good rideability. When presented in-hand the Auwert 514 offspring have satisfactory scope and power in the walk. The trot is roomy and remarkably powerful with distinctly good balance and suppleness.

Conclusion

Auwert 514 has an excellent hereditary profile for exterior (breeding values breeding type 111, conformation 110, legwork 113; total 114; Star% mares 64%; Star% stallions 47%). The offspring demonstrate to have good characters both in the yard as well as in the work. In their performances they show above-average total scores both in the saddle test and the harness test, with good quality of basic gaits. Length in the walk remains a point of attention. Based on the distinctly positive overall hereditary profile Auwert 514 will be approved on offspring.
